FAMILY REUNIONS

We do not remember of ever hearing before in one year of so many family reunions and picnics as has been in vogue this summer. No section is exempted but it seems to have been a State-wide movement.

And we are glad to see this. There is nothing finer and nothing more conducive to home life in America than for families to meet in these annual gatherings, the family ties of which have, in many instances been too often neglected or forgotten. Every year we see more of these gatherings and we trust the contagion will spread until every American family will make it a point to gather their particular clan around the picnic table at least once a year and renew acquaintances and brush up on family history.

Speaking of these annual gatherings, the Hickory Record says: "Time was when family reunions were few and far between and required long preparation and much planning. Nowadays the member charged with the secretarial duty sends out the post cards, the women of the households get busy with the picnic dinner and on the morning of the appointed day the various scattered families hitch up their old flivvers and hop to it.

The family reunion is more popular than the Sunday School picnic, judging by the number being held throughout the Hickory area this summer.

"Pride in a family name is usually back of these gatherings of the clans. As our American civilization takes on age, men think more of their forefathers and the part they played in the building of the great structure we call America.

"Sometimes the descendants and relatives by marriage go back to the ancestral home, assembling at the call of the secretary for a day of jollification each summer in the open. College professors and farmers pitch horseshoes as partners. The woman of fashion sits down to talk over family affairs with her cousin the seamstress or the farm wife. There is such a mingling of personalities and social ranks as makes for good democracy, and those who participate are the better Americans for their annual reunions with those of blood relationship whose walks in life are usually so far removed they never meet except on these occasions."
