

Cloisters to Be Built With Rockefeller Gift

Going Exploring on Old Rum Ship

Here are John Hays Hammond, Jr., and the Diamantina, converted rum-runner which he has refitted and on which he proposes to sail around the world. Hammond will try to discover the locality and cause of certain dead spots at sea where radio waves are inactive, and also will promote the development of faster and more efficient sailing craft to compete with power vessels.

Building Will House Art Objects

A gift of \$2,500,000 by John D. Rockefeller, Jr., to the Metropolitan Museum of Art has made possible the building of the structure pictured here. The "Cloisters" and surrounding grounds will occupy four acres in Fort Tryon park overlooking the Hudson. The site was reserved for the building and gardens when Mr. Rockefeller presented the park to New York city in 1930. It is hoped the new buildings will be ready for public inspection in 1938.

The project will supplant the present Cloisters built by George Grey Barnard, noted sculptor, to house the statuary and art objects he has acquired. He sold his art collection to the Metropolitan museum in 1925, and lent its trustees the property and building that the collection might not be moved. With the construction of the Rockefeller building, the original building will revert to Mr. Barnard.

The building pictured above will be one of the most beautiful in America, and will rank favorably with notable European museums.

Scenes and Persons in the Current News

IN THE NEWS: 1—Mrs. Fletcher M. Johnson of Irvington-on-Hudson, N. Y., who was selected as the "Typical Mother of 1935" for the nation-wide celebration of Golden Rule Mother's day, May 12, with one of her grandchildren. 2—Strikers picketing the plant of the Chevrolet Motor company in Toledo which was closed because of the strike. 3—Some of the large party of Minnesota farmers who have left to make new homes in Alaska under the auspices of the FERA, boarding a train at St. Paul for San Francisco.

BOSS OF THE CREW

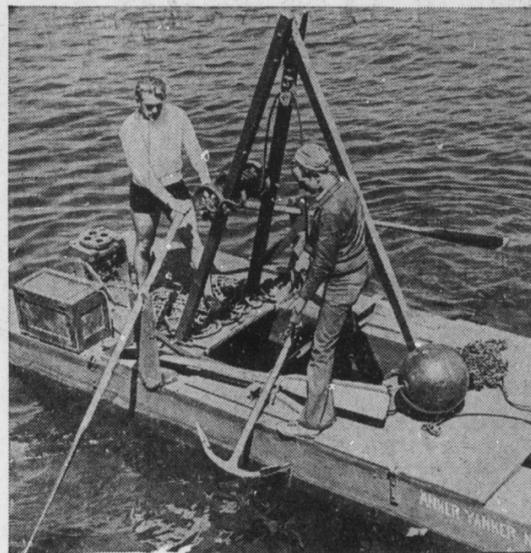

Pretty Caroline Neill of Manchester, Conn., who is this year's captain of Wellesley college varsity crew.

1,400 Leave for Alaska

Hoping to find new opportunities, two groups of American farm people are leaving for Alaska as a part of a FERA colonization project. About 200 families will make the journey, together with approximately 400 CCC workers who have volunteered for this project.

One group left May 1, and another is scheduled to start about May 15 on the journey. These modern pioneers will make the journey from San Francisco by government transport. In Alaska they will build new homes, and attempt to start life over again.

Here's an Odd Way to Make a Living

When yachtsmen at Santa Monica, Calif., want their anchors laid at the bottom of the harbor they engage the services of Dave Foster and Frank Quinn, young college students, who have thought up this odd way to pay their expenses in school.

BIRDS' FRIEND IS 70

Jack Miner, whose huge bird sanctuary near Kingston, Ont., is internationally known, has just celebrated his seventieth birthday. He is here seen placing a splint on the injured leg of a wild goose.

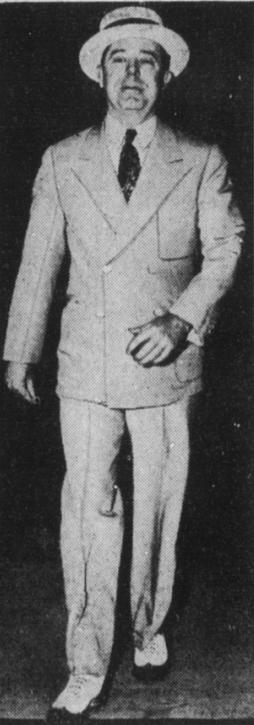

FARM ECONOMIST

Howard T. Tulley, who has been appointed chief economist of the Department of Agriculture, in his most recent photograph.

Huey Stages Style Show

Here is Senator Huey P. Long of Louisiana as he appeared in Washington in all the glory of his new

spring garb. The Kingfish said: "I had to come back to show these people how to dress." His costume consisted of a straw hat with gay band, a tan tropical suit, lavender shirt with checks, red and green tie and tan and white sports shoes.

Good Military Students Get Medals

Secretary of War Dern presented Pershing gold medals to eighteen young men from the C. M. T. C. and R. O. T. C. of the nine corps areas for excellence of attainment in military education. In the photograph Mr. Dern is seen giving his medal to Alexander E. Lawson of Mt. Olive, Ill.

Stalin Addresses Session

When I. V. Stalin, Soviet dictator, speaks, Russians listen. He is shown in a characteristic pose as he addressed the session of the commission for studying the project of the model constitution for agricultural arts during the second all-union congress of collective farm shock-workers.

Stalin's original program, which called for complete control of all agricultural activities on a communistic basis, is reported to have undergone drastic revision and many provisions relaxed.

Slated for High Post

This is Gen. Joachim von Ribbentrop who has been promoted by Chancellor Hitler of Germany to a

High command in the Nazi Guard troops and, according to rumors, will be given the rank of ambassador-at-large.

Something New for the Bay State

William E. Chamberlain, left, secretary receiving from Charles F. Connors, chairman, the first horse race license ever issued. It was to be used at the Raceland track at

Sulphur Once Condensed

From Fumes of Volcanoes
Men have been familiar with sulphur since before the beginning of written history, notes Thomas M. Beck, in the Chicago Tribune. Ancient scientists were peculiarly fascinated by it. The fact that it usually was found near volcanoes and that it was about the only known mineral substance that was inflammable, led them to regard it as a sort of solid form of fire, possessed with a cosmic importance almost equal to that of the gods. This feeling that there is something supernatural about sulphur has continued to the present day.

The ancients were correct when they attributed magical properties to the substance. It has been said without exaggeration that sulphur plays some part, either directly or indirectly, in the preparation of 90 per cent of all the things we use.

Where do we get our sulphur? Until about thirty years ago almost all of it came from the neighborhood of volcanoes, where, during past ages it had been condensed from fumes issuing from the earth's interior. There was not much demand for the stuff in ancient times except as a curiosity. The first industrial demand for it came about the year 1500, when gunpowder, of which sulphur is an ingredient, began to come into general use.

Consumption of Sea Foods
The approximate annual per capita consumption of all fishery products, fresh, smoked, dried and canned, in the United States amounts to about 15 pounds. The annual per capita consumption of commercial production of fresh water fish is about 2 1/2 pounds.

Earthworm as Food
The earthworm was at one time eaten by humans in different parts of the world. In parts of China and Japan it is still thought to have a medicinal value in fever cases and native Australians consider it a good remedy for rheumatism.

Passion for Nature Deep
The passion of the Japanese for nature is deep-rooted. Many festivals at all seasons of the year are bound up with flowers. Their artistic designs represent one or another of nature's beauties. Delicacy of line is prominent in their qualities and the Japanese home is a delight to the eye.

The Pimpernel
The pimpernel is any of a genus (Anagallis) of plants of the primrose family, with white, blue or scarlet flowers, which, in one species (A. arvensis), close with the approach of bad weather.

Father Neptune Opens West Coast Bathing Season

When the weather seemed propitious and the water warm enough at Santa Cruz, Calif., Father Neptune came ashore to open the bathing season for that region, including San Francisco, and was greeted by a bevy of lovely swimming girls.
