THE BANKS HAVE AMPLE FUNDS

We are pleased to set the statements made by President R. M. Hanes of the Wachovia Bank and Trust Company "The banks of North Carolina have ample resources with which to finanace business in this state," declared President Hanes. "There is an abundance of idle funds seeking profitable employment." "It is easy to see that the loans and discounts of our banks can be more than doubled and still leave ample room for legal and secondary reserves.

On July 1st, the total resources of banks in North Car-olina approach one-half billion dollars, the exact \$423,-

We have never urged banks to jeopardise their institutions by promiscuous loaning, but we are glad to see the statement of Mr. Hanes that the banks can double the amount of their loans to local communities and peoples without violating legal bank reserves.

We have felt that business has been retarded because the average citizen who owns house and lot can not go to our financial institutions and get small loans with which to start new business and new enterprises, and while we are not criticising the banks, because thay were too conservative, it is absolutely true that but for the national government, under the leadership of the President, coming to the rescue of citizens, there would be thousands without homes today, who have secured loans and are meeting their payments.

In many instances we feel that State institutions should have these loans and draw 6 per cent instead of holding government bonds and in many instances, drawing less than one-half of the legal rate in North Carolina.
