ALL WAR MINDED

Wilson Daily Times

Great Britain is also going after her tax payers with a vengeance in an effort to increase her armaments, to the extent that her navy and army will be able to protect her far flung empire and dominate Europe.

Great Britain has found that if she controls Europe she must put out the money and increase her war strength, for there is no telling what combinations may be made against her. She has found that Italy is liable to do something to affect her prestige and to threaten her defense in Africa as Mussolini has done in Ethiopia, and Germany is likely to do something in Europe, that will not altogether sustain her reputation as mistress of the sea and the land.

England has found that they do not "sit up and take notice" when she speaks as they once did, and so she is getting ready

to arm herself, so they will pay more attention to what she says.

For years, in collaboration with the United States, she has tried to reduce her armament, but that has not contributed to her power to make good her threats. When she told Mussolini what to do, he paid no attention, and when she talked to Franco the insurgent commander of Spain about fooling with English shipping he told John Bull that food stuffs were contraband of war, and England announced that her ships must obey the rule not to move into territory commanded by the insurgent vessels for the purpose of conveying food to the starving inhabitants of the besieged Spanish cities, and they did not venture into the troubled waters.

Some people are of the opinion that England's ministry is too weak to be pugnacious, even if it had the equipment to compel the other countries to bow to her will; but certain it is that so far her threats have amounted to nothing and the little countries of Europe make faces at her and do as they please.

And Uncle Sam has awakened and decided that it is best to prepare for eventualities, and all the work that has been done in the way of reducing armaments is now in the discard, and President Roosevelt realizes that we have a tremendous shore line to protect, and with insufficient armament to do it effectually. He proposes to strengthen our defenses and increase the number of ships in our navy, and the fleet goes off into the Pacific for battle practice, and evidently Japan will be awed by so much fighting splendor and cease to crow as loud as she has about taking over the Pacific and dominating that vast expanse of water.

CASHING CHECKS AT THE BANK

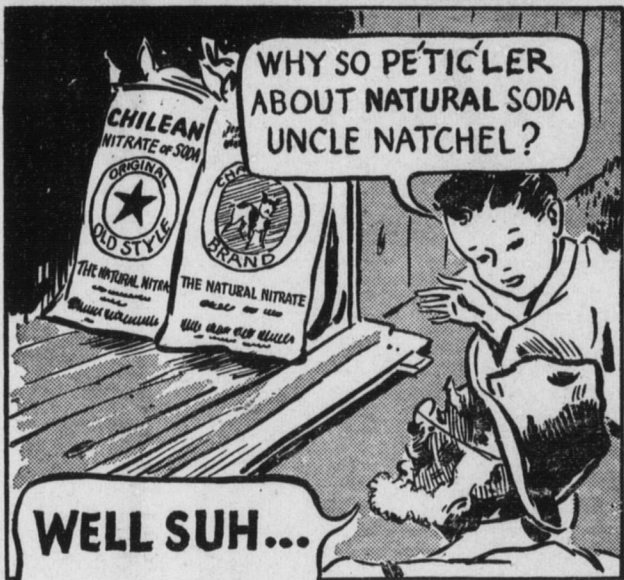

FREQUENTLY, people who are not customers ask us to cash checks. We can oblige them only when they are properly identified, or establish financial responsibility.

The reason for this, as any banker will tell you, is simple. A bank, when it cashes a check, must be sure that the money has been paid to the right party. It must also protect itself against the check returning unpaid due to insufficient or uncollected funds.

The best way to avoid delay or inconvenience is to open a checking account in this bank.

Warm Up...with a Humphrey ...Circulator

Ten seconds in front of one of these efficient room heaters and you'll see why we say, "Warm Up... with a Humphrey Circulator." It's most amazing to some people the way these trim modern portables put out the heat. And now they come in four sizes to handle the heating needs of practically any size room.
Is there a hard-to-heat room in your home — bedroom, attic room, basement den, sun parlor? The low cost solution to the problem is a Humphrey Circulator — priced especially low during our present sale and operating for but 2c to 4c an hour. Come in and see them. A Portable Circulator to take off the chill will save a lot of expensive furnace forcing this year.
