the first day of December he planted wheat on land which had produced cotton. There being a thirty day difference between the seeding date the wheat which was planted on the 25th of October produced 20 bushels per acre and wheat which was planted on the first of December produced only 8 bushels per acre and the same seed and the same amount of fertilizer was used on each field. It is advisable to have all wheat sown by not later than the 15th of November if best results are to be obtained.

Some of the new colors in hats are laurel and olive green—India brown with a trace of red and a dark brown called Coffee—Teal and Royal blue.

city of soil has been demonstrated by F. J. A. Barnhardt of Concord, route 3, for the past two years. Cotton planted after the clover has withstood the dry weather without losing its fruit or leaves.

BY THE PIECE
With the development of quick freezing of drawn poultry and the packaging of parts of the bird, the number of store outlets for dressed poultry has been increased.

Don't burn your leaves! Pile them up to decay. There is no substitute for humus, or decayed vegetable matter, for the lawn or garden.

NASH COUNTY FARM NEWS

Monday, September 19, Charles H. Flory, Extension Soil Conservation Specialist, visited the county and secured petitions for soil conservation district which he had signed up last week.

On Wednesday M. A. Morgan, A. A. representative, from State College conducted a meeting in the county for the purpose of training the tobacco review committee of Edgecombe, Johnston, Franklin and Nash counties.

A visit was made to the home of Charles Cone, 4-H Club member, who is conducting a baby beef project and he was assisted with training his animal for the show ring.

J. M. Henley, A. A. representative, visited the office relative to assisting in problems in connection with the triple A.

A visit was made to the farm of W. T. Braswell, Castalia, and he was assisted with laying out plans for landscaping and planting a lawn.

On Saturday of this week posters were placed in the ten warehouses in Rocky Mount showing the progress of tobacco over the past ten years in order that the farmers who sell tobacco there might be able to see some figures which they have forgotten.

At this season of the year the better farmers in the county have already planted rye and Crimson clover. It is recommended that Crimson Clover, Vetch, Austrian winter peas be planted around this time of the year for spring hay and green manure crops because cover crops planted now will hold the soil next winter and when turned under next spring will be equivalent to a good manure on the land.

A very interesting fact was brought to my attention on the farm of J. E. Hoyle in North Whitakers township last year. Mr. Hoyle planted one field of wheat on tobacco land on the 25th of October and on
