

TRAFFIC COUNTERS ARE INSTALLED

The U. S. Forest Service has installed traffic counters at Cliffside and Van Hook Recreation areas. This will give an accurate count of the vehicles entering these areas. The total number of vehicles will then be multiplied by a factor, which is the average number of passengers in each vehicle, to give an estimate of the number of visitors each area receives during the year. The U. S. Forest Service will use these figures in long range planning for maintenance of the recreation areas and making additional facilities available for camping and picnicing in the Highlands area.

Recreation enthusiasts will be at their peak during the next three months and questions concerning camping, picnicing, swimming, fishing, hiking, etc. can be answered at the office of the Highlands Ranger District which is located above the Post Office and is open to the public on Monday and Friday of each week.
