"THE GREATEST SHOW ON EARTH"

"The Greatest Show on Earth," playing Saturday, September 2, at the Galax Theatre, combines two of America's most popular entertainments---a Cecil B. DeMille Technicolor spectacle and a big-time Big Top Show.

This panoramic melodrama of the circus and circus life is supershowman DeMille's biggest, most lavish and costliest productions. More than \$4,000,000 and almost three years of planning, research, training, and actual production went into "The Greatest Show on Earth."

It is the first picture to deal authentically with the circus and the performers and workers who keep it rolling. It is also the first Big Top spectacle in which Hollywood stars perform their own circus stunts. Among those who flouted the laws of gravity in the interests of exciting realism are Betty Hutton, who soars daringly above the tanbark; and Cornel Wilde, who stunts precariously on the flying bar. Gloria Grahame with a jaunty disregard for the frailties of the human body supports an elephant's foot on her face. Other stars are Charlton Heston and James Stewart.

Made with the cooperation of the Ringling Bros.-Barnum and Bailey Circus, the DeMille epic features hundreds of Ringling's famed attractions---circus "flyers," acrobats, tightrope walkers, clowns, performing elephants and horses, as well as the entire menagerie of animals gathered from the four corners of the world.
