Wm. C. Boruff, General Manager

WEEKLY COMMENTS

One of our younger summer residents, Miss Anne Dodson (526-2739), and a group of her young adult friends, are doing their best to re-open our Highlands Community Theatre. Any and all support is needed, but particularly in the area of directing. Anyone who has had any experience whatsoever, amateur or professional, in this field, is urgently asked to call Miss Dodson, even if a little advice is all they have time to give. The young people would like to put on "Mary, Mary", but they're in heavy weather right now.

Also, as we noted in an earlier column, there is a large group of working collegiates in this area, and Miss Dodson hopes that together they can do at least one Hootenanny. So the call is out for any folk-singing singles or groups, spare guitars, talent of any kind. Help from any direction will be SO VERY WELCOME.

Mr. Ralph deVille, owner and proprietor of the Stone Lantern, has again brought to Highlands a most attractive resident of Kyoto, Japan, Mr. Yagi Susumu. Mr. Susumu, who is a bachelor of 24, has his own porcelain shop in Kyoto, and has come to us for the summer to share his expert knowledge on behalf of the Stone Lantern.

Last week we mentioned the newly formed duplicate bridge group. We gave you date, time and place, but of course

at the first meeting, the date and time were changed, on the vote of those present. The place, Skyline Lodge, on the Flat Mountain Road, remains the same. The games will now be held on Wednesdays at 7:30 p. m., instead of Tuesdays at 8:00. If you would like to play and do not have a partner, call Colonel William Britton, the director, who will be glad to pair you up. His phone is 526-2177.

Our dependable Town Governors apparently have an eye out for the comfort of their populace. As our last week's edition went on the counters, with an item suggesting grass-cutting on East Main Street, the town mower was cutting the grass on East Main Street. Also, we have noticed activity around the Post Office approaches, improving these approach paths with asphalt, etc. Thank you, Town.

Tonight at 8:00 p. m., Dr. James Hardin of North Carolina State University, will give a talk on poisonous plants. He will speak at the Highlands Museum Building, on the road to Horse Cove. This lecture is the first of the regular summer series held for the public by the Highlands Biological Station. There is no charge. We highly recommend that all readers go, particularly if they have kids who wander the woods.

Did you know that on Sundays, after church, which is around noon, the most
