RECORD TURNOUT AT ROTARY

Malvina Trussell, Ph.D., a retired biology professor from Florida State University, Tallahassee, who spends every summer at her attractive Horse Cove home, told some 59 Rotarians and guests about her Miami winter home at the regular meeting last Tuesday. Extra tables were brought in to accommodate the large number of guests. Secretary Bud Potts stated that in his opinion this was the largest attendance at any regular Rotary meeting since the club was chartered in 1945.

The C.T.A. Towers, where Dr. Trussell lives in the winter, is located on Brickell Blvd., close to Rickenbacker Causeway, overlooking Biscayne Bay. Her apartment on the 14th floor commands an outstanding view of the bay, Miami Beach, the Causeway and downtown Miami. One of the best features of the building is that it has a stairway in addition to the elevator so Dr. Trussell, noted for her many hikes in the mountains, can keep in shape by walking up to her abode. Another advantage is that the entrance is only four blocks from the new I-95 which connects with the Sunshine State Parkway and I-75 so it is possible to drive almost all the way to Highlands without a stop and go light.

The C.T.A. Towers, in addition to being a wonderful place to live, is, in a sense, a new concept in retirement living, according to Dr. Trussell, who was one of the pioneer tenants. A full program of activities is provided, each person is requested to make a report of his or her talents and abilities. The list of available skills was surprising.

SHOW-ME TOUR

On August 20th from 9:00-12:00 a.m. Mr. Jimmy Bishop will conduct the final Show-Me Trip by car. Mr. Bishop, Resource Forester, will stop at selected points along the route to discuss the flowers and other interesting features of the Blue Valley area. All those interested should meet at the Museum of Natural History of Horsecove Road at 8:45 a.m.

THESE ANIMALS NEED HOMES

Does your child need a pet? The Macon County Humane Society is happy to report that all the animals listed in last week's paper were adopted. If these animals are not adopted in a certain amount of time, they will have to be destroyed.

The following animals need homes:
2 black puppies
part-collie dog
spayed female, black long-haired dog -- and some kittens.
