he was a newspaper publisher.

According to Menninger, one of the main causes of the world wide campus unrest which has received so much publicity in recent years is the fact that many college students are scared - they do not know what to expect in this uncertain world. A partial answer is available to Rotary Clubs - providing contacts and through use of Careers Research Monographs. These pamphlets, samples of which were displayed by Dr. Ralph Sargent, describe approximately 300 subjects, including over 1,900 distinct types of jobs. Each "Monograph" is a printed report of comprehensive research surveys conducted on a nationwide scale by leading authorities, universities, and government departments. The aim is for students not only to select a career but also to plan their courses accordingly. Where Interact Clubs exist in high schools (one is planned for Highlands this fall) providing the Library services as a splendid club project.

## "ONCE UPON A TIME IN THE WEST"

The Western film, once the very life blood of the motion picture industry, suffered a temporary decline in popularity during the last decade. Many producers felt the Old West was too unsophisticated for this fast-moving, hip generation. They claimed the Western was no longer acceptable fare and out of touch with this age.

The man who has helped revive the Western and re-established it in top

place in the world of the cinema is an Italian writer-director, Sergio Leone, director of Paramount Pictures' "Once Upon A Time In The West", the biggest Western made in more than 20 years. The film is in Technicolor and widescreen and plays at the GALAX THEATRE Thursday and Friday, August 21 and 22.

"Once Upon a Time In The West," is a Western in the grand manner, a multi-million dollar production set during the lawless period of the building of the railroads across the West in the 1970's.

Across the screen stalk the people of the period--the swaggering gunmen, the outlaws, the settlers, the railroad construction gangs, the corrupt and the greedy, who try to steal the land over which the railroad will have to run and the Indians, who are to be pushed farther back into the wilderness by the coming of the Iron Horse.

There are the saloons and their brawling customers, railroad barons, bandits and just plain townspeople, all of whom play their part in this story of the American frontier.
