

PROTECT YOUR JOB

Most fires can be prevented. If a fire occurs, it generally indicates that some condition existed which might have been foreseen and eliminated, and that someone has been careless or negligent in taking necessary precautions. Your company knew this and therefore spared no effort or expense in making this plant a safe place for you to work. It is now up to you to keep it so.

Fire proof construction has been used wherever practical, a 100,000 gallon elevated sprinkler tank has been provided and more than 3,400 sprinkler heads installed throughout the plant. Thirteen three-way fire hydrants are located at strategic points around the mill yard and each is equipped with 150 feet of hose or a total of 1,950 feet. Water for these hydrants is provided by a centrifugal fire pump capable of delivering 1,500 gallons of water per minute at a pressure of 100 pounds. Seventy-one fire extinguishers of 8 different sizes and kinds and 19 additional lengths of small hose are distributed around the various buildings. Four regulation fire ladders are available for fire use only.

A Fire Brigade consisting of 60 men divided into four companies has been organized and is now being trained. An inspection of fire fighting equipment and for fire prevention is made weekly.

Many disastrous fires have been traced to some simple little act of carelessness. Do your part by being careful and by reporting any condition which you think may cause a fire.

The security of your job rests to a large extent upon you. A fire may rob you of it.

SEVENTY-EIGHT RECEIVE FIRST AID CERTIFICATES

As part of our safety organization program, the company recently made available to all employees here classes in First Aid.

Seventy-eight employees took advantage of this opportunity, attending in three shifts for two hours each day over the two-week period of instruction. Those who successfully completed the courses have received First Aid Certificates from the North Carolina Industrial Commission and soon will receive certificates from the American Red Cross.

These classes, conducted by Mr. B. L. Webster, Field Supervisor of the Western Safety Council of the N. C. Industrial Commission, were found very interesting; and the opportunity given to learn something which might be so useful in business, at home, or elsewhere, and at any time, now or in the future, was appreciated.

It is hoped that with the training these employees have received through the management's arrangement with Mr. Webster, not only will accidents be minimized throughout the mill, but in the event of an accident to an employee, a number of fellow-workers will be prepared to render immediate and proper aid.

Another series of First Aid classes will be held in the future, and it is hoped these will be attended by the other 70 to 80 employees who signed up as applicants but, for one reason or another, failed to attend the first series. These courses may be of great benefit to anyone, and it is the management's hope that eventually all employees may be trained in First Aid.

who never than he gets ever gets paid than he does.

Mr. A. J. Loeb, better known to Ecustans as "Art" Loeb, recently returned to Brevard. Mr. Loeb is Vice Pres. of the California Central Fibre Corporation and has been located at El Centro, Calif., for the past year. On Nov. 12, Mr. Loeb was married to the former Miss Kathleen Vachreau of Wausau, Wis. The ceremony took place in Chicago and their honeymoon was spent in Florida. We extend our very best wishes to the bride and groom and hope that their stay here will be an extended one.
