TO THE FRONT

On May 23rd, 1939, the Filter Plant started the first operation of any kind at Ecusta. The plant was started with one operator. By Christmas four operators were keeping the Filter Plant going on a twenty-four hour schedule. These operators were "Nat" Heyward, Burwell Hall, Robert Gottlieb and Jimmy Morrow. Of these one hundred per cent are serving our country in the Armed Forces. "Nat" is with the Medical Corps in Texas; Burwell

Join Scrap Brigade; Back Community Chest

The aluminum from 7,700 ordinary pots and pans will release sufficient raw material to make 16,000 one-ton aerial bombs. Thus do figures issued by the War Production Board illustrate the connection between articles of everyday use and the weapons and missiles of war. When we consider that these two examples are from a list that covers practically everything

A Twenty-Four Hour Fight Our safety and Medical Department is engaged in a fight against an unseen force that is just as serious a menace to our security and ultimate victory as saboteurs, spies, and

prevented by this treatment. Statistics say much of our loss time is due to colds, sore throat and bronchitis—respiratory diseases. Try to keep from taking a cold by proper care and if you have a cold, cover your mouth and nose while coughing and sneezing. Avoid close contact with others and help us to keep down the spread of infection.
