Keep your credit good; it's safer.

Write that V-Mail letter you were to sleep to write last night.

Replace broken window-panes before these winter winds arrive.

Clean out chimneys, rainspouts, crowded closets, etc., today.

Make a storage pit, or get the man of the house to, for root crops.

POSTWAR CREASES—Coming for men: Treated wool that can be made into trousers which will keep their creases in the rain and will not wrinkle in suitcases.

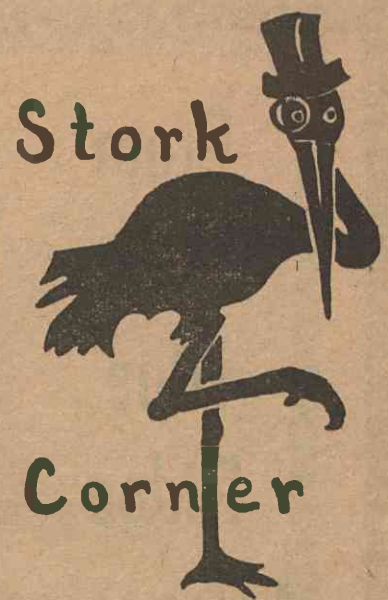

CHRISTMAS CARDS & WRAPPINGS—Christmas cards will not be plentiful this year, due to the paper shortage, but the supply will be brightened by the addition of several new designs not permitted last year. Wrapping paper and gift boxes will be scarce. You can help stretch the amount considerably by avoiding double wrapping and double boxing.

SCUFFLESS LEATHER—A practically scuffless patent leather for shoes, luggage and upholstery is coming up for civilians as soon as vinyl plastics can be released from their wartime duties.

MORE LAMP SHADES—You can brighten up your lamps now that the production of wire-frame lamp shades is permitted. Lamps themselves still cannot be made, except in special instances.

VACUUM CLEANERS—will not be as long coming back on the market as some of the other household equipment because many plants making cleaners also make the motors that go in them. They won't have to wait for deliveries of component parts.

DON'T KEEP THE CHANGE—Keep your small change in circulation. The mints are turning out more money than ever before, plus some special coin-making assignments for foreign countries and a big job of military medals.
