THIS YEAR'S GARDENS—

This year you can start using your Victory gardening tools on flowers and ornamental shrubs, as well as a few choice vegetables. This year's gardening theme will be attractive surroundings, economy and recreation. There's talk here of urban agents who would help town dwellers plan a flowering hedge as carefully as county agents tell farmers about hybrid corn.

GETTING YOUR NEW HOME

built immediately after the war will not be a simple matter. For one thing, you will be competing for materials with millions of home-owners needing to make major structural repairs. Officials in Washington estimate about 15 years will be needed to bring the house supply of the nation up to a satisfactory standard.

OLD CLOTHES—

Soon you will be asked to participate in another used clothing campaign for overseas relief. In Europe alone there are 20,000,000 displaced persons to be reunited with their families and friends. Most of them have been unable to buy new clothing at any time during the war. Russia, as a single illustration of what the need is, has produced no fabrics for civilian clothing in two years.

ITEM TO A-CARD HOLDERS—

American planes operating from Italian bases in June alone consumed enough gasoline to supply 136,000 of you with rations for four years.

STILL IN THE TALK STAGE

—but definitely coming—is the plan to pressurize large cabin planes so passengers can zip across the continent 20,000 feet up. You would see less this way, but it would make more room in the air and you could get their quicker.

TOO TRUE, EH, GI?

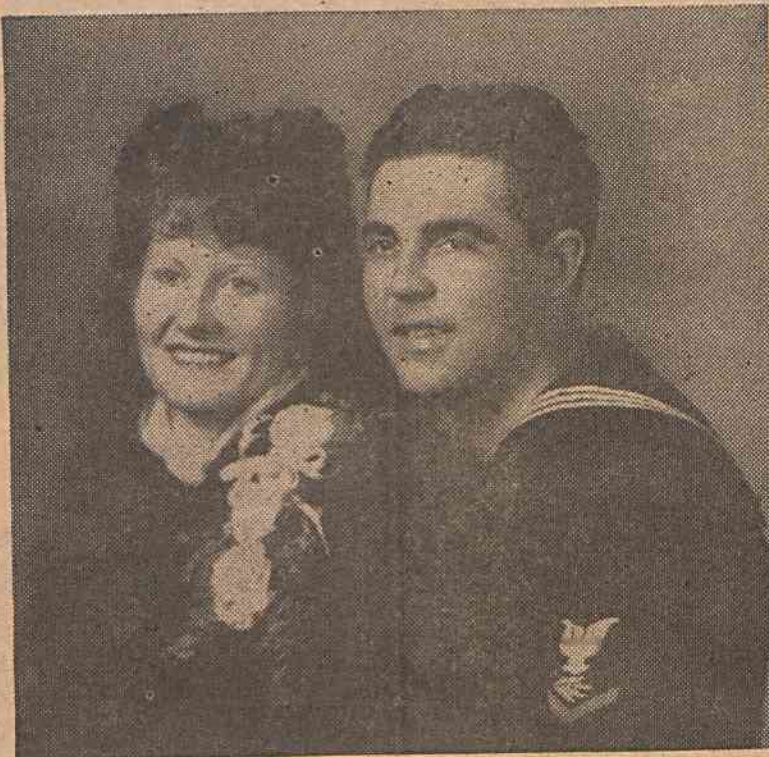

Two little sardines were swimming aimlessly in San Diego bay. One suggested, "Let's go up to San Francisco for the week-end." "Oh, no," objected his companion. "It's much too long a swim." "Well, we could go by train," ventured the first sardine. "What! And be jammed in like a couple of soldiers!"
