

Stationed On Guam

CPL. JULIUS W. TINSLEY is a baker in the U. S. Marines and has been overseas 16 months. He is now stationed on Guam having been on Guadalcanal and in the battle of Okinawa. He was employed as a printing operator prior to entering the Marines in April 1944. Julius had basic training at Camp Lejeune, N. C.

In Air Forces

SERGEANT CALVIN RAXTER is a mechanic in the army air forces, stationed in Manila. Calvin entered service in July 1942. He trained in various states, including South Dakota, Michigan and Utah before going overseas in September 1944. Calvin was employed as a bleacher helper here.

Must File Tax

(Continued From Page One)
 If your case is complicated and you need help on filing either the federal or state income tax returns, you may get assistance by stopping by the Personnel Office. It will be necessary for you to bring a list of all deductions which you think you may claim, along with your withholding certificate which the Company has furnished you, showing your earnings and tax withholding.

There's one man who's not in favor of calling Washington, The Carnation City. The Capitol Hill doesn't smell that good to Ickes.

Even though it's raining, Monday morning's Police Court record shows it's a fine day.

Two Girls Going

(Continued From Page One)
 in Ecusta's Main Office.
 Mrs. James B. Pickelsimer, daughter of Mr. and Mrs. George Huskamp, is now employed as a Powers model in New York City. She has been highly complimented by several large concerns for pictures for which she has already posed. Her work has, so far, consisted of doing illustrations for commercial advertisements and magazines. According to present indications Mrs. Pickelsimer, a beautiful brunette with a pleasing personality, will go far in her new career, and prospects for the future look very promising. Her father, Mr. George Huskamp is in the Main Office.

There's no place like home—if you can find one.

Veteran May Get Educational Leave From His Position

Any veteran of our company, who is entitled to the educational benefits under the G. I. Bill of Rights and who desires to continue his education, may be granted a leave of absence for this purpose. It will be necessary for him to apply for this educational leave of absence and complete certain necessary records in the Personnel Department.

During a leave of absence for this purpose, seniority will not accumulate. The veteran will, however, be allowed to finish his course of instructions and return to the company without losing the seniority accumulated during active employment and active military service.

Many advantages are offered by the Government to veterans who desire to continue their education. They can go to college, high school, private school, or to specialized schools. To be eligible, a veteran must have served for at least 90 days since September 16, 1940, and must have had an honorable discharge. Even if a veteran served less than 90 days and was discharged because of a service connected injury or disability, he, also, will be entitled to the educational benefits. The active service of 90 days will entitle the veterans to one year of education. If he successfully completes his first year, he may then be entitled to additional years of education equal to the number of years of his active service in the Armed Forces. The Veterans' Administration will pay tuition costs, not to exceed \$500.00, and will also give the veterans an allowance of \$65.00 per month, if single, or \$90.00 per month, if married. If you need additional information get in touch with the Personnel Department.

New Products To Come

A magnetic recorder which will lift the receiver from the hook, answer the phone, and record the message is now in its laboratory stage. This gadget will answer the phone by saying, "Hello. This is Eldorado 7500 but the Smiths are not at home. If you care to leave a message, it will be recorded."

A new cardboard tray containing 100 sheets of carbon will soon be placed on the market. The typist will be able to lift up one or more sheets of carbon at a time without smudging her fingers.

A new 40 h. p. pump only nine inches in diameter has been placed on the market. It produces 5,000 lbs. per square inch pressure and may materially widen the use of hydraulics.

IDEA IS WANTED

The Five Year Service club needs help. We want a banner or plaque in the Cafeteria. You don't have to be an artist. We just want your idea as to design.

All employees are eligible to submit their ideas. This is not limited to Five Year Service club members. A \$25.00 victory bond for the best suggestion. Submit your ideas before March 31, 1946 to Luke Harrison or George Heyman.

Everyone should practice self-preservation . . . never take needless chances.
