## Month Of April

April, April,

Laugh thy golden laughter,  
But, the moment after,  
Weep thy golden tears!

—William Watson

April, one of the loveliest months of the year, has a name that is especially fitting for it comes from a Latin word meaning "to open."

The paradoxical weather of April finds both the opening buds and the closing snowstorm; both freezing rain and warming sunshine.

It is a season of new life everywhere. Grass grows freshly green; trees and shrubs that have seemed dry and dead put out tiny leaves, and little twigs can no longer be snapped off sharply, for the sap is flowing in them, and they have acquired a new strength and a new resistance.

April Fool's Day, a day celebrated on the first, for no known reason, and begun no one knows when, is celebrated in the United States, Canada and abroad as a day when practical jokes go unpunished, through usually not unrevenged. Easter usually falls in April, and many states in this country celebrate one day in April as Arbor Day, a day set aside for the planting of trees. April 1, 1789, is remembered as the day when Washington was elected President. On April 14, 1865, Lincoln was assassinated, and on April 15, 1912, the "Titanic" was sunk with a loss of 1600 persons.

## Vacation Hints

When the vacation you have planned arrives, enjoy it; don't let it be spoiled by an illness or accident which could have been avoided.

Observe these suggestions:

1. Drink only water that has been certified by health authorities.
2. Be particularly careful of the storing and conditioning of your food. Inspect it closely.
3. When acquiring a sun tan, do it gradually and save yourself a lot of suffering. Beware of intense rays of the sun when bathing, boating, gardening and swimming. Reflected rays burn too quickly.
4. Always protect your head with a hat when in the hot sun.
5. If you happen to be troubled with high blood pressure, avoid excessive heat.
6. Know your swimming limitations and do not exceed them. Be sure to stay out of the water until at least two hours after a meal.
7. Relax a few minutes each day. Right after meals is a good time.
8. Get sufficient sleep—at least eight hours.
