## William Baley Is Married To Miss Reynolds May 5th

The wedding of Miss Annie Laurie Reynolds, daughter of Mr. and Mrs. William C. Reynolds of Asheville, and William J. Baley, son of Mr. and Mrs. James M. Baley of Marshall, took place on Sunday afternoon, May 5, in the Merrimon Avenue Baptist church. The Rev. G. Carlton Cox, pastor, performed the ceremony.

The church was decorated with greenery and tall white tapers arranged against a background of green and baskets of white gladiolus and Easter lilies.

The bride was given in marriage by her father. She wore a street length dress of aqua crepe made on princess lines with yoke of mesh. Her only ornament was a string of pearls. She wore white accessories and carried a white Bible topped with an orchid and showered with white ribbon and tiny white flowers.

After the wedding the couple left by motor for a wedding trip to Miami and Daytona Beach, Fla. For traveling, the bride changed into a yellow wool suit with white accessories and a shoulder corsage of orchids.

The bride is a graduate of Lee Edwards high school and attended Blanton's Business college. The bridegroom is also a graduate of Lee Edwards high school and Mars Hill college and attended Cecil's Business college. He recently received his discharge from the army after serving 21 months in the European theatre, and is employed in the Inspection department. The couple will reside in Asheville.

## Ecustan Weds An Asheville Girl

## Less Sugar Means More Ice-Cream

Now it can be told. Last September 1st. was a red letter day for the Johnnies and Marys all over the nation who had gone ice-cream hungry for so long.

According to preliminary reports by the United States Department of Agriculture, the make of ice-cream rose from 125 million gallons in the last four months of 1944 to about 181 million gallons in the same months of 1945. Translated into easily understood terms, that means an increase from a little over five servings a month per person for every individual in the United States in the 1944 period, to nearly eight servings per person in the corresponding months of 1945.

The increase in ice-cream manufacture has probably been accompanied by a decline in the make of sherbets and ices, in the opinion of the Department of Agriculture. Ice cream requires much less sugar in its manufacture than do these other frozen foods, and consequently more gallons of ice cream can be made with the same amount of sugar. Because of its lower sugar content, ice cream contains fewer calories per serving than most ices and sherbets, according to the National Dairy Council. At the same time, ice cream is a superior food, in that it contains all of the constituents of milk.
