Second Hubby: "You're darn lucky. Mine thinks that in the daytime."

## Your Guide To Daily Living

From Washington Bureau

ELECTRIC CORDS of the future are due for a longer life because of a metal alloy so new it still has no name. It conducts electricity almost as well as copper and has twice the strength.

ALUMINUM STEPLADDERS\_ strong and so light a child can carry them-are coming on the market. They cost a little more than wooden ones, last considerably longer.

ONE OF THE NEW ELECTRIC IRONS comes with a booklet of exercises you can do along with the ironing to help you ward off fatigue.

YOUR WINTER'S FOOD. Canners will deliver for grocery shelves this year the largest number of cases of canned fruits and vegetables in their history. Even so, they are not ready to say that the supply will be abundant.

GOOD NEWS ABOUT SHOES. Officials forecast that supplies will equal demand by Thanksgiving. By next spring shoe inventories in stores will be large enough to satisfy almost any desire as to size and style.

A SERIOUS DROP IN COPPER production during early summer months is one important reason why electrical appliances are no more plentiful now.

INFLUENZA VIRUS VACCINE used with good results by the army and tested by U. S. Public Health Service will be available this fall. You get your shots from the doctor, not the druggist. Meantime, the army continues experiments with an immunization against lobar pneumonia. Injections to ward off this disease may not be available in your doctor's office for a long time yet, but one worked out for the army is about ready for mass try-outs.

FLOWERS THAT NEVER FADE and retain their symmetry for months are possible as a result of experiments at the University of Florida. Chemicals set the colors, and a quick bath in clear plastic stabilizes the shape. Some of these days you'll be wearing real flowers on your hat.

CHEWING GUM WITH VITA-MIN K built in will some day make your teeth stronger. Experiments at Northwestern university show that this vitamin markedly retards the growth of dental caries and that chewing gum is a good medium for spreading the use of this important vitamin.

A TWO WAY RADIO SET small enough to fit into your pocket has been developed. A farmer's wife could use it to call her husband to lunch. Besides its many uses on the farm it is said to work well in crowded down-town areas where the army walkie-talkies have run into static.

TEMPERATURES CONSTANT both winter and summer, are promised for the car of the future, thanks to a new device which greatly increases the efficiency of automobile heaters.

ALL-PLASTIC LUGGAGE will be available soon in a variety of colors and patterns. It will weigh about the same as airplane luggage, sell for somewhat less than metal cases.

DUSTPAN ON WHEELS. An automatic dustpan can be had which will do the pickup work with no bending or kneeling or downward pressure on your part.
