

REFINING NEWS

By Jack Rhodes

Take notice all you fishermen!! You may now stop your moaning and groaning due to the fact that the big fish got away. Enno Camenzind has a fool proof solution to your problem, if you don't believe it try it for yourself.

All you have to do is to go to Pawley's Island, South Carolina, on your five days off or even your vacation and catch all the big fish you wish, we have the live proof of it; just ask Camenzind when you see him.

If any of you readers have any stale cigars at home that you would like to dispose of, please do not throw them away, give them to Burgin Kilpatrick. Any donations will be appreciated.

Many of our employees have taken vacations since the last issue of The Echo, which makes it practically impossible to give in detail where each person vacationed, but our primary concern is with Markley Jones who has the week of October 15th off. Will he or will he not kill a bear?? Read our article in the next issue of The Echo. Confidentially someone told me that he could not hit the side of a barn with a shotgun, he did take a rifle didn't he??

Several of our employees and families attended the Duke-Tennessee game, all reported a grand time even tho' the score was out of balance.

Clarence Nicholson can get more game with his automobile accidentally than most of these hunters can get on purpose, isn't that so Clarence??

Frank Patton keeps talking about Florida, must be a vacation coming up. All birds take notice in the deep south: Fly North where it is cool, because Patton may not hit you but he might be able to come so close that it would be too hot for comfort.
