

Above: Though not exactly a "wheeled vehicle" this power shovel does quite a bit of moving (earth moving) for the Buildings and Grounds Department. With the substitution of a leverage arm in place of the scooping arm, the "vehicle" becomes a crane—capable of lifting tremendous weights. Above right: Bob Rogers (Landscape Crew), who is also the shovel operator, is shown at the controls of another well-known earth mover—a bulldozer. Right: The bicycle is proving to be a shoe sole saver for the boys who handle the Departmental mail. Shown are Cline Sentelle (standing) and George Taylor. Far right: Though not an "Ecusta vehicle", the Southern Railway's diesel pays visits twice a day to the Paper and Film Divisions leaving raw materials and supplies and picking up finished paper and cellophane. Bottom right: At the wheel of one of the company station wagons, chauffeur Eddie Moss waits while Jim Metcalf makes out a trip ticket.
