Activities Editor.....	Ruby Jean Herring
Sports Editor.....	Paul Clay

BUSINESS STAFF

Business Manager.....	James Self
Circulation Manager.....	David Belcher
Chief Reporter.....	Bill Bryant
Reporters.....	Joe Bunn, Gail Fisher, Janet Hodges

EDITORIAL

Needless to say, the success of any college athletic program depends upon the students themselves. The willingness of the student body to attend football and basketball contests involving Asheville-Biltmore teams hits a very low standard for junior colleges.

Remember the football season just past? No more than fifty persons, or less than a third of the entire student body, watched the Bulldogs meet some of the finest junior college elevens in the South. And, as the ultimate result, recent news releases told the story that Asheville-Biltmore would not be represented on the gridiron next season.

Did the same attendance situation reign during the basketball months? If you were at the City Auditorium on any given evening which found the Bulldog basketeers showing, the answer would have spoken for itself.

"PARTNERS IN PROGRESS" FILM SHOWN DURING ASSEMBLY JANUARY 31

"Partners in Progress," a one-reel technicolor film showing the development of the rural telephone system, was shown during the regular college assembly period on January 31.

The colorful sound movie traced the progress made by Southern agriculturists during recent years, and showed the vital role of the telephone in the farmer's life.

The film was shown here by Mr. Roger DeLoach, a representative of the local office of Southern Bell Telephone and Telegraph Company.
