Dr. Rainey At West Point

WEST POINT, NY - - A new image of world politics is emerging in American Foreign Policy, cadets at the U.S. Military Academy were told this week by a political science professor from the University of North Carolina at Asheville.

In a series of six lectures to the Army cadets Monday and Tuesday, UNC-A's Dr. Gene Rainey said: "This new image will be a fusion of the realist and idealist views that have dominated U.S. policy for the past 200 years.

The reason for the "new look" at foreign policy is the resurgence of Soviet military strength and the development of U.S. economic weakness, he said.

"Whether or not we accept the view that the Soviet Union was aggressive during the 1940's and 1950's, we must now accept the fact that the Russians are attempting to match our military position," Dr. Rainey said.

As long as the U.S. experienced weakness in its balance of payments and was dependent on foreign petroleum, the traditional view that America was not vulnerable would have to be modified, he said, noting that the U.S. military position relative to the Soviet Union has worsened.

During his stay at West Point, Dr. Rainey also conducted a workshop on simulation for officers teaching social studies at the academy.

The cadets currently are reading a book written by the UNC-A faculty member, "Patterns of American Foreign Policy," as a class text. Dr. Rainey's appearance was part of a regular lecture series at the institution.

Dr. Rainey

DR. KING NAMED ACTING CHANCELLOR

Dr. Arnold King was named this morning as acting Chancellor of U.N.C.-A. Dr. King will serve in this capacity until Dr. Highsmith can return from his leave of absence.

Dr. King is a native of Hendersonville, North Carolina, and a graduate of UNC-CH. His graduate work was completed at the University of Chicago, where he earned a Ph.D. in History.

He joined the UNC-Chapel Hill faculty in 1925 as a professor of History. He also served at Chapel Hill as the Dean of the Graduate School and Director of summer School.

In 1964, Dr. King became Vice-President of the consolidated UNC system. He served in this capacity until 1972. At age seventy, he retired as Vice-President to become Assistant to the President.

Dr. King is the author of the study which brought UNC-A, UNC-C and UNC-W into the UNC system. Dr. King is presently in Chapel Hill, and according to Jay Jenkins, director of Public Information for UNC, should be arriving in Asheville early next week.

Science Forum

The first University of North Carolina at Asheville Science Forum of the year, dealing with "Solar Energy, Passive Style," is scheduled for 1 p.m., Thursday, in Room 122 Rhoades Science Bldg.

Dr. Robert S. Cole, associate professor of physics, will present a brief talk, illustrated by slides of current developments in solar heating and cooling of buildings. His talk will include a survey of existing solar buildings as well as a discussion of passive systems and why they are currently generating excitement among solar energy enthusiasts.

Sponsored by UNC-A's Undergraduate Research Association, the program is open to the community as well as all students and faculty. Purpose of the forum is
