The Foundation

Members of the UNC-A Foundation's Board of Directors meet in D. Hiden Ramsey Library to discuss plans for the university. Clockwise, starting with Carolyn Frady, administrative assistant to the Chancellor, are Dr. Highsmith, Chairman Dr. Wayne Montgomery, Vice Chancellor William Pott and board members Gerald Beyers, Charles Dyson, Sidney Hughes, William Hackney, Henry Colton, Dr. Robert Williams (UNC-A), Everett Carnes, Mortimer Kahn Jr., Mrs. Overton (Ruth) Gregory, Dr. William Bruce (UNC-A faculty and Foundation member), Ernest Mills (partly hidden), Gene Ochsenreiter Jr. (inside tables), Dr. Desmond Coughlin, William Pomeroy Jr., Frank Coxe (right) and Glenn Morris. Present but not shown were Mrs. Charles (Virginia) Dameron, Foundation member Mrs. Julia Ray of the UNC-A Board of Trustees, William G. Moore Jr., Mrs. William (Mary) Prescott, George Self, Mrs. Frank (JoAnn) Edwinn, Osborne Hart, Harry Clarke, Verne Rhoades, Robert Polak, Durward Everett Jr. and Student Government Vice President Michael Ochsenreiter.

'No Small Plans' In UNC-A's Future

Dr. Wayne S. Montgomery, Asheville physician and mayor of the city from 1969 to 1971, became chairman of the UNC-A Foundation's Board of Directors Oct. 22 at the group's annual meeting for election of officers in Ramsey Library. He will serve a one-year term as head of the 34-member body.

Montgomery told the new members of the board the organization has a double responsibility. It must do everything it can, as the body primarily concerned with university activities "which are not supported by taxation," to help the university grow and develop.

At the same time, the board must encourage the Foundation's members to better acquaint the people of Western North Carolina with UNC-A's

Employment Depends On Right Career

By Mike Ochsenreiter
Student Editor

According to forecasts recently released by the Bureau of Labor Statistics, employment prospects will be mixed in the 1980s. Job prospects are bright indeed for people with the right skills in the right communities, but there might be some disappointment ahead for those who are not able to be flexible about where they live and what kind of work they do.

For men and women fresh out of college, the outlook is for tough sledding in many career fields. Until the late 1960s there were more jobs for college graduates than there were graduates to fill them. Since then,

however, graduates have faced keen competition from all quarters for the jobs they wanted, and experts expect the trend to persist through the next decade.

By the numbers, there will be approximately 1.6 million new jobs each year from the anticipated growth in the economy. In addition, 3.9 million openings are predicted each year as workers die, retire or quit jobs for other reasons. The total of roughly 5.5 million yearly job openings just about equals the number of people expected to enter the work force each year in the next decade.
