

last for years.

What caused a student to choose the type of pet they have? And their names.... where did the name come from? They are as varied and sometimes as comical as the pets themselves, and yet they almost always seem to fit. Some animals have almost human-like personalities. What quirks do your pets have? I would like to dedicate this column each month to profiling these pets – these companions - and their owners.

If you and your pet would like to be profiled in this column, please email me at [moosejd@brevard.edu](mailto:moosejd@brevard.edu). A photo will be included of you and your pet. I am sure I will enjoy meeting these friends of yours, and I am equally sure others will enjoy learning about them as well. Let me hear from you, and help me make this column a success.  
Peace y'all!

Moose

Whitfield-Cargyle.

These students have come through a selective process. They prove each day, while they strive for excellence, that they belong in this newly founded group. Congratulations to all its members! Next year this may be for you.
