Explosions raise concern on campus, one student arrested

Last week, campus security received numerous reports of small explosions occurring on various parts of campus, including the inside of Beam Hall. The explosions caused no injuries or property damage. One student, Mathew Thrialkill, has been arrested in connection to the homemade bombings.

Head of Security Stan Jacobson believes the bombs consisted of plastic bottles containing tin foil and a liquid cleaning product, called "the works." When this mixture is sealed in a pressurized container, an explosive chemical reaction normally occur within minutes.

On Sept. 27, a plastic bottle detonated in the main stairwell of West Beam Hall. Apparently, the explosion caused nothing more than a loud noise and a small mess. On the following Friday night and Saturday morning, other outdoor explosions were reported to have occurred near the gym and between the tennis courts and the North Village.

On Oct. 2, police arrested BC student Mathew Thrialkill on three counts of disorderly conduct for allegedly causing the explosions on campus. Thrialkill was also charged with one count of misdemeanor larceny for stealing a case of beer from Ingles on Sept. 24.

Dean Sue Yowell says that Campus Life initially placed Thrialkill under an interim

suspension, which was lifted after an Administrative Hearing, where it was decided that Thrialkill is not currently a danger to the campus community. On Oct. 4, a College Hearing Board took place to decide on disciplinary sanctions; the sanctions have not yet been released for public record.
