

SGA Executive Board FA 14- SP 15

President

Burton Hodges

I was born in Birmingham, Alabama, but I grew up primarily in Charlotte and in Winston-Salem, NC. My Dad is an episcopal priest so we moved a lot when I was younger, my family moved back to Birmingham after I left for college so I don't really refer to anywhere as "home." Brevard is closest to it. I moved to the area after an unsuccessful first attempt at college at the University of Alabama and I found Brevard College while taking a semester off and working in Hendersonville.

I am a proponent of good beer, good scenery and good people, thus Brevard is a perfect spot for me. I am an avid trail runner and an advocate of yoga. I am a die-hard Alabama football fan, have an acute obsession with the Carolina Panthers, and I thoroughly enjoy a good round of golf. I swear by seeing live music, but I am not opposed to some Tupac or John Coltrane depending on my mood. I love politics but hate bad politicians, I aspire not to be one of those. I want to live in India, learn Mandarin and never travel to Russia.

Vice-President

Stephen Olson

"Milk can do your body well, but I can do your student body better." Seems like a lame catch phrase, but the impassioned humorist in me thought it might get a laugh out of at least a few. In truth, I care so much about Brevard College. This is my first full year, and I have loved so much about this institution, but there is always more to ameliorate. As Vice-President of Student Government, I will help put this school in the direction of renewable energy. Throwing solar panels up on the roofs of buildings is more complicated than it sounds, but sustainability is a passion of mine. I feel as though helping to connect students to the school would be great, and I know that sometimes it takes more than joining a club to develop that connection. I will work with each and every club at this school to reach and out hold more events for all students to attend. In terms of the student government itself, I want to create an environment where more votes are held, and more decisions actually get made, so all you guys can see the great things we'll be doing in the Fall. I wish I could write more, as I have numerous ideas and plans to bring to the table as Vice-President, but hopefully this is enough to get you excited about having someone as passionate and realistic as me on the Executive Board. Bring any idea you have to make Brevard College better directly to me, I want to have everyone's voice represented in SGA. Keep your stick on the ice Tornadoes, and God Bless the States.
