

"The Crush"

--Jeremy Mullins

Soft and gentle, you touch your face
Your lips I yearn to caress mine
Eyes as beautiful as day
As I watch you, I fantascize

I can feel your touch
Hear sweet words of passion
You breath on my neck as you speak
All of this I can imagine

My respiration increases
How I would love for this to be true
I watch your every movement
I wish I could speak, if you only knew

My thoughts are overwhelmed
You are perfect in all way
I dream about you every night
And lust for you all day

Your hair is sexy and brown
Hands show every vein
Your legs are long and muscular
This is purely your way

You don't know what you do to me
How I long to be yours
I only know your name
And nothing else, no more

You will never know my affection
Never even touch
I wish I could hold you and love you
But for this I ask too much

So I'll set quietly
Keeping my thoughts to myself
Some day I'll tell you how I feel
And only hope for the best

Then my dream will come true
And we will be together
Time will pass quickly
And passion will flourish forever

But I set here in a daydream
Returning back to the fact
Your smile is amazing
And I feel lucky to at least have that

You are probably taken
By someone else more fortunate
I'll admire your every movement
And ask nothing of it

Reality setting in
I feel my heart race
I'll admire you from afar
I enjoy your handsome face

Some day we'll be friends
And I'll tell you all of this
We'll laugh and joke and carry on
And then I'll plant a kiss.

"Nature Must Go On"

—Jeremy Mullins

I set looking upon the breezeway
Focusing upon the butterflies
Their colors are no longer here
This mission is done
For nature must go on

My friend is gone
To a better place than I
His earthbound spark extinguished
For reasons not known why
But his mission is done
Now we must go on

Only time will tell
When my time will come
Then friends will miss me
As for they too, must go on

Many years shall pass
Their future shall come
Then they'll look toward the angels
As they hear their names sung
For their mission too is done
And nature must go on.
