Who's new at Louisburg College

Dean Moore enjoys Lou-U

Dean Beth Moore studies student file

By WILLIAM WARREN

The new Assistant Dean of Students Elizabeth Moore is known for her friendly smile and helpful nature. Beth is a native of Wilmington Delaware. There she attended Brandy Wine High School. She continued her education at Elon College.

While attending Elon she was president of the Student Union for 2 years, a member of Sigma, Sigma, Sigma and earned a BS degree in Human Services.

After graduating from Elon, Dean Moore worked at their admissions office. She was a recruiter for Elon in the northern part of our country for three years.

Ms. Moore then resumed her education at UNC-G. there she earned her masters

in counseling. Also while at UNC-G she was resident director. She then went to Georgia Southern where she was a resident director in a dorm consisting of 400 women.

When asked how she was enjoying her job here at Louisburg College, she said, "I really enjoy being here, the people are so nice and my work is challenging. I like to keep busy." She also stated that this is her first time teaching.

Dean Moore is very gifted. She has a special talent in art and she likes water skiing and cooking desserts. When asked if there was anything else she wanted to say, she stated, "I've really enjoyed working with the students. They are a great group."

Brown to Head Computer Department

By DAVID READ

Louisburg College welcomes an addition to its staff. Matthew Brown, a 1968 graduate of Louisburg College, is functioning as an instructor of mathematics and business. He heads the Computer Programming Department at Louisburg and is excited about this position. Matt grew up in Louisburg and now resides just outside the city limits.

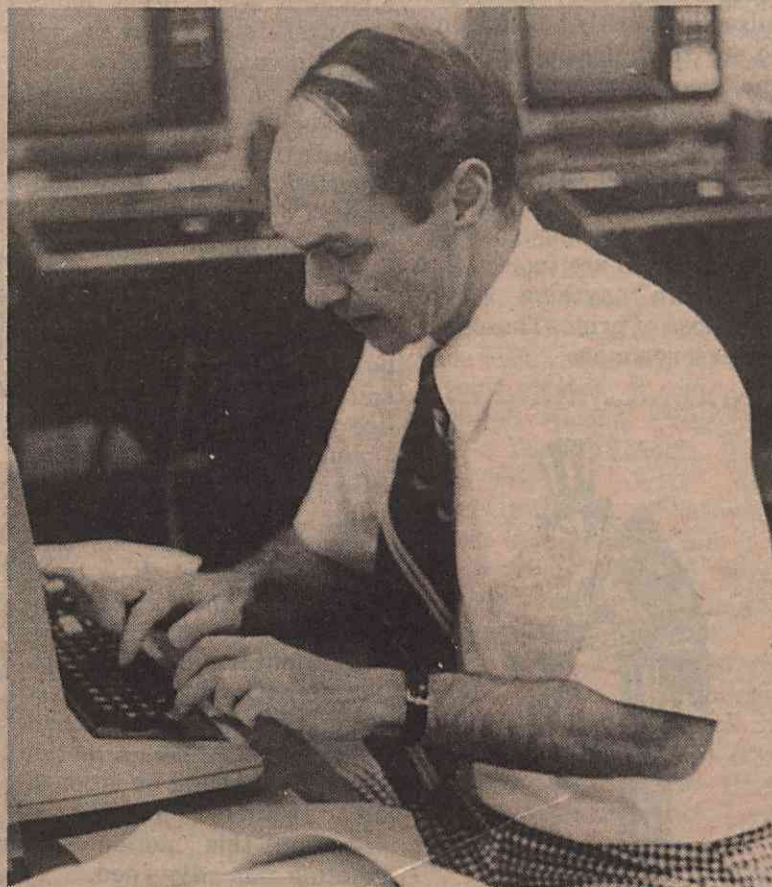

Matt emphasizes the transferability of computer courses and the fact that the college will offer PASCAL programming next semester (as well as BASIC.) The beginning

computer science student starts with data processing following a general application. There are 15 TRS-80 units for BASIC and PASCAL students representing a considerable investment.

Computer Science has switched from the Math Department to the Business Department. Brown emphasizes that the computer programming area is in a state of flux and that new courses may be added as needed.

Matthew Brown is an easy going, extremely competent part of the Louisburg College Staff.

Mr. Matt Brown shows style at computer keyboard

This issue of The Columns is devoted to a series of articles on the Faculty & Staff at Louisburg College designed to bring to the attention of the readers the jobs they perform and their importance to the college.

White to head Women's Basketball

By CARLA A. JOYNER

Sam F. White, a previous faculty member at Louisburg College, has returned as coordinator of intramurals, women's basketball coach and physical education instructor. White, who was employed at Louisburg from 1973 to 1975 before accepting a position at Campbell University, replaces Tommy Twitty who has joined the local business community.

White holds a B.S. degree from High Point College and an M. Ed. from the University of North Carolina at Chapel Hill. Before coming to Louisburg the first time, he was a teacher and coach at Southwood Junior College and Sanford City Schools. After leaving his position at Campbell University, White operated a family-owned service station. His desire to get back into athletics, directed him back to Louisburg College.

With five sophomores and nine freshmen candidates for the women's basketball team, White seems to be very optimistic about the approaching season. With the amount of talent they possess, he feels they will have a successful season if they can develop the right chemistry.
