King speaks about faith

"When it is dark enough, you can see the stars. I shall never forget the first time I took a night flight in one of our powerful jets.

"As that mighty plane lifted up into the heavens, I looked out of my window and saw great spurts of flame pouring out from the side of the plane. I became a little concerned. The stewardess, noticing this, came over to explain to me that those very flames emanated from jet planes at all times when they took off in flight.

"She told me that they were there when

the planes took off in the daytime. The point was, you couldn't see them unless it was dark enough.

"Now I want you to know that the fears which had come to me at the sight of those flames didn't indicate that I have no faith in God in the air. It's just that I have more experience with Him on the ground."
