

## 'Dogs Nip Lenoir-Rhyne 87 To 86

Photo by Mike Gurley

The G-W Bulldogs used its home court advantage to edge the L-R Bears 87-86 in a barn-burner Saturday night. The Bulldogs remain unbeaten at 14-0, while the Bears drop to 13-4. This was the 73rd straight home victory.

An overflowing crowd of about 2200 squeezed into Best Gym. Several fans were turned away because of unsafe conditions as judged by the fire marshal.

G-W was led in scoring by Lew Young with 32 and Carl Martin with 24. Garrey Brown scored 25 for the losing Bears.

The first half saw the

score change on several occasions with the score tied 44 to 44 at the half. The second half was just as exciting as the first with G-W maintaining a slight edge. The Dogs jumped to a 58 to 50 lead in the second half, but L-R stormed back to tie at 60. With L-R never able to take the lead, the Dogs went on to win 87-86.

Coach Holbrook complemented the L-R Bears stating that they have one of the best clubs in the country in A.A.I.A. circles. They have proven that by defeating Appalachian State, who was the leader of the Southern Conference.

## Psychology Project Is A Success

Deciding that his project for abnormal psychology class at Gardner-Webb College had to involve the community somehow, Tim Cook, a student from Lincolnton, N.C., set out to seek a relationship between the college community and patients at Broughton State Hospital in Morganton.

"We use Broughton Hospital to observe patients and see what the hospital is like, but we've never done anything for the patients," Tim noted. "Why not make it a two-way street? Invite the patients over here to Gardner-Webb to participate with us. So we decided to invite those patients who were able and wanted to make a field trip to G-W for dinner and entertainment."

Tim and his psychopathology class planned a gala evening for the patients; entertainment was by students. After the dinner, Art Whitmore and Rick Blair, guitarists and singers, performed humorous songs and Tom Query put on humorous magic act, much to the delight of the eighteen patients and students and faculty attending. Then everyone seemed to have a wonderful time singing old hymns and Christmas carols.

"I think something like this, where the patients are made to feel a part of the community, where they feel we are aware of their needs and that they are still a part of the community, is one of the most healing devices you can use," commented Tim, who has worked with patients at the mental health clinic in his hometown of Lincolnton before attending Gardner-Webb. "It also acts as a kind of behavior modification, a kind of reward. The patients themselves decided whether or not they wanted to attend, those with milder disorders.

"I'm glad we were able to do this," Tim said. He and his classmates paid for the dinner out of their own pockets. "I think it was a healing experience for them," Tim observed. "They certainly seemed to appreciate it."

Tim noted that Jim Rash, head of the art department at Gardner-Webb, had pioneered in the area of community volunteer work with Broughton Hospital and that Gov. Hunt had commended him for his service.

"I think it'll take things like this to broaden one's knowledge and help better prepare the psychology students for things ahead," Jim commented. "But most important, I think we're fulfilling a need in the community. We're reaching out to others."

## GWC SPOTLIGHT:

### Greta Setzer

Perhaps one of the most interesting if not intriguing personalities on Gardner-Webb's campus is sophomore Greta Setzer.

A chemistry major from Bessemer City, North Carolina, Greta excels in both basketball and in her academic endeavors; as proof, Greta has never fallen below a 3.8 G.P.A., and on occasion has peaked to 4.0.

While in high school Greta was showered with honors, among these were: Most Valuable Player in all three years of her career, All Conference in her junior and senior years, Player of the Year in the Southwest Conference in 1976, Gastonia Gazette All-Gazette honors, Gazeteland Player of the Year, and played in the W.N.C.H.S.A.A. All-Star Classic. Greta was voted Athlete of the Year and was class Valedictorian in her senior year.

During her two years at Gardner-Webb Greta has proven to be a great asset to the girls' basketball team. She won the Most Valuable player award last season and leads the team in scoring with a 20.8 average.

Whether in the classroom or on the basketball court Greta applies hard work in reaching the goals she has set for herself. "I like the challenge and experience gained from any type of physical participation, the physical always complements the mental. I compete because of this and the individual goals I want to reach."

While not an active women's lib advocate, Greta feels it has played an important role in gaining the rights of the women athlete. "In the past women often had to ask for opportunities in sports and athletics. Now opportunities are in abundance; women's athletics are growing rapidly. Women athletes don't 'enjoy being called jocks'. We just want to participate."

At this stage of her life Greta feels that her education takes precedence over playing basketball. Because of this she may not play on the team next year. "Recently, and I guess for some time my ambition has been to become a physician, and I won't let basketball interfere with this. I hope to attend medical school after 1 graduate from Gardner-Webb."

With the dedication in which she accepts the challenges that face her and with her zestful flare of enjoying life, Greta indeed has a bright and successful future.

## Entertainment Arena Planned

(Continued From Page 1.)

phothon in March or April of this year.

McGee wants us to know that "it is going to have to be a Gardner-Webb family project and not just for several or one person." The college is involved in a \$10.5 million total development program, and this just represents \$3.5 million of it.

"This building will be mainly for intercollegiate basketball games, designed for the capacity of a four-year senior college. It will not be extravagant; we are building it because we have to have it. The present gym was constructed for a junior college, equipped for only four or five hundred students. Now we have 1500 students, and with four or

five classes going on simultaneously, it gets pretty hectic. The old gym will continue to be used for intramural games, free play, and various other activities. Then people won't have to be turned away for overcrowdedness."

The Sports-Entertainment Arena will probably be built where the present baseball field is because of the low terrain. Consequently, there will be less grading out and moving dirt. Then of course there will be plenty of parking facilities.

Everyone should keep in mind that this building will be a great asset to our school. We need to work together to keep it from being abused. After all, it will be our building.

## Talent Show

Start planning your acts NOW for the Phi Beta Lambda Talent Show. Auditions will be held on April 13. The show will be April 20.

## Happy Valentine's Day
