

St. Andrews students unload

Hannas Resigns; Search Begins

Beginning in 1967, as a freshman, Craig Hannas entered into a long relationship with St. Andrews. After twelve years of contact with the school, he accepted the position of Dean of Students during the summer of 1982. Now after one year as Dean, Hannas has accepted a position with IBM in Raleigh, North Carolina.

"I've had an inkling towards business for years. I just liked education so much I couldn't leave. I don't dislike it now, but I realized the decision would only become harder with time," said Hannas.

Hannas will remain close to academia in that he will serve as a marketing representative for the academic information

Dean Hannas

systems, (ACIS), division at IBM. "I will be marketing products for major research institutions."

Dean Hannas will continue to serve St. Andrews until September 15. He will strive to achieve, "an integration between student life and the curriculum, with emphasis on the total educational process."

Ronald Crossley, Vice-president and Dean of the College, said, "We are looking for a member of the faculty or staff to serve as an interim Dean for the remainder of the year. A search for a permanent Dean is underway and hopefully we will have a replacement by the middle of the year."

Hannas characterized his service by saying, "It was an invigorating and rewarding experience. Never a dull moment. There were no major controversies only a few conflicts and predicaments, which were handled by all fractions."

During his period in office, Hannas has worked to "encourage and enable students to accept responsibility for their learning and living environment."

Orientation Opens New Year

By Maureen Ingalls

Orientation...to new members of the St. Andrews community, this probably brings to mind anxious moments of registration, room assignment, and a multitude of other details to be given attention. For seasoned St. Andrews students, the busy three-day period (September 3-5) means an opportunity to welcome the new members of the community and to help dispel the fears inherent in the "anxious moments" of an unfamiliar experience. Parents of new students are also encouraged to participate in the Orientation program so as to become more familiar with the educational aims of the college and meet face to face with faculty, staff and administration.

New students are slated to arrive before noon on Saturday, September 3rd. Dormitories will be open at that time so that room keys and orientation packets may be picked up from the residence directors. Students then will proceed to the Belk Center which is the site for all other check-in procedures. There faculty, staff, administration, and students will be on hand to answer questions and provide information on student life.

After a lunch break, Convocation, an annual event to welcome new students, will be held in Avinger Auditorium. The event features a keynote speaker and an address by Academic Dean of the College, Ronald C. Crossley.

Later in the afternoon session, freshmen will meet with their selected SAGE 101 classes and tutors while, simultaneously, parents will meet with the SAGE professors and discuss the college's core program.

Finally, the social side of the campus emerges...after meeting with residence directors and dorm officers, new students are invited to a lakeside mixer featuring live entertainment on the patio of the Belk Center.

Sunday, September 4, pro-

ves somewhat less busy. In the early afternoon, freshmen will meet with Associate Dean Jim Stephens to discuss registration procedures. From 2:30 to 5 p.m. freshmen will return to SAGE 101 groups while transfers will meet with school administrators. Dinner for freshmen will be held at their SAGE professors' homes while transfer students enjoy dinner at the home of Bob and Billie Martin. At 9:00 p.m., a live band will be featured on the Belk Center patio for all new and returning St. Andrews students.

Testing and registration are the final activities scheduled for Monday, September 5. The staff of Career and Personal Counseling Center, under the direction of Dr. Elbert Patton, will be administering the diagnostic battery of tests to entering freshmen. Transfer students will use this time to meet with their faculty advisors in preparation for the afternoon registration ses-

sion. Following the testing period, freshmen will return to individual SAGE groups to discuss registration procedures.

After lunch, all new students (freshmen and transfers) will register in the small gym where many people will be available to answer questions and offer guidance. President and Mrs. Perkinson will host a dinner after registration closes for all new students, SAGE professors and sophomore tutors between 5:30 and 8 p.m. on the lawn of their Main Street home.

Regular classes begin Tuesday, September 6, 1983.

Craig Hannas, Dean of Students said that the orientation program is shaping up to be an "essential, complex, and exciting experience for all involved." He went on to say that the scheduled activities should "put in place a mood of productiveness and community characteristic of St. Andrews."

Campus Gets New Look

By Maureen Ingalls

Construction projects have abounded on campus over the summer, giving a "new look" to both sides of the lake. Over thirty thousand dollars has been allocated for the repair and necessary renovation of the dormitories as well as the Belk Center and Pate Hall, the college's convention center.

Most recently, Winston-Salem dorm has undergone the most obvious alteration. The main lounge area has been carpeted and the old seat cushions have been recovered continuing the push to maintain the physical attractiveness of the campus. Housing Coordinator of the Student Life Office, Patsy Webb, remarked that efforts are underway by school officials, to replace draperies in the main lounge areas of the residence halls where they are badly in need of repair.

Perhaps the most glaring change that has occurred over the summer has been the closing of Mecklenburg dormitory, home to 40 - 50 students. There has been a marked decrease in the number of available private rooms campus-wide to accommodate the former Mecklenburg inhabitants.

An additional \$130,000 has been allocated to better facilities on the academic side of the lake. A host of projects slated for completion by the beginning of Fall Term, 1983, includes the construction of the new psychology laboratory on the ground level of the Morgan-Jones Science Complex. Components of the new facility feature a new perception laboratory, a sound-proof laboratory, a computer laboratory and five additional observation rooms. Further renovations have
