

# ON CAMPUS

## Hosstyle

Pat Hoss

Thanks to the caring efforts of the Concerned Readers of the Lanced, Pat Hoss has been fired. If there is anyone else out there who would like to have any member of this staff fired because they have said something you don't like or agree with, just write an anonymous letter to tell us or your favorite faculty member. We'll make sure that only nice, polite, rosy things are written and that the likes of Pat Hoss are shut up forever. Thank you Concerned Readers of the Lanced.

## SIMPSON NAMED DIRECTOR

By Chad Esposito  
Asst. Editor

After months of reviewing resumes and applications, the Physical Plant Office has recently named Bobby Simpson the new Director of Internal Affairs and Public Relations. The choice was no surprise to Simpson who knew that a college education, coinciding work experience, and having a tooth missing were great credentials for the job.

Simpson sees the Physical Plant as an excellent opportunity to put to use his practical managerial skills. He also feels that the Physical Plant has the potential of keeping maintenance at a quality that the students will appreciate.

Simpson's three main goals for general Physical Plant improvement are 1) Every worker must speak proper English, 2) Every worker must wear a coat and tie, and 3) Every worker must carry a briefcase at all times.

"It is a fabulous emotional rush to realize that after 95.654% of my intellectually stimulating college career that I would obtain a challenging and exhilarating position." Simpson also added that he was looking forward to the power that the job would entail and if things got rough, he would knock out another tooth.

St. Andrews is equally looking forward to the presence of Mr. Simpson. Dean Greer also expressed her appreciation for Bobby accepting the job after being accepted and turning down Yale Law School. Greer also feels that the addition of Bobby could only improve the general maintenance condition of the campus.

## SPEED BUMPS TO BE PUT ON CAUSEWALK

three speed bumps, equally spaced, on the causewalk so bikers would not be allowed to drag on the strip.

The Dean also emphasized that sometimes students do get a little crazy, especially Spring Term, and sometimes try to drive across the causewalk. She feels that the presence of the speed bumps might inhibit the possibility.

The Dean pointed out that installation of the speed bumps is a measure purely for student safety, as are all rules. "The causewalk straddles the lake. If a pedestrian is walking on the causewalk and has to jump out of the way, there is no telling

what could happen. The pedestrian would either suf-

fer injury or would have to jump into the lake and pay a fifty dollar fine."

After viewing the proposal, President Reuschling backed the Dean's decision and saw the speed bumps as a top priority project.

Reuschling also warned the wheelies in L.A. to slow down because if any further injury or excessive speeding occurs, speed bumps in L.A. could become a reality.

The Student Senate discussed the pros and cons of the issue and agreed upon the necessity.

By Chad Esposito  
Asst. Editor

Recent complaints by pedestrians about being hit by bicycles on the causewalk has prompted the Dean of Students to look into the possibility of having speed bumps installed. The proposal would mean two or
