

# URBAN LEAGUE PRESENTS CAREER DAY

by Selena Baker

Mr. James Dickerson '66 graduate of our college, is an engineer at the Newport News Shipbuilding and Drydock Company. Mr. Dickerson is now living in Hampton, Virginia. He is a native of Fremont and is married to the former Miss Doris Cherry who was a '65 graduate. He feels that each student should take full advantage of opportunities that are available and if you apply yourself, there are numerous companies that are interested in your service because the demand is growing all the time.

Miss Eloise Bishop '66 graduate of our college, is from Murfreesboro. She is now working for the city of New York as a Counselor in the New Careers Program. She thinks that all students should decide on their aims and objectives before their senior year and take advantage of all opportunities. The New Careers Program is an Amendment to Economic Opportunity Act designed to train, educate and develop underemployed people over 22. Before getting her job, Miss Bishop attended conferences at Hampton Institute.

Mr. Jesse R. Penn is employed at IBM in East-fashkill. His native home is Martinsville, Virginia. He is an Electric Engineer Components Design Analysis. He attended Howard University and is now attending Syracuse University. Mr. Penn feels that education is the key to success. He was unable to make statements regarding his job because of its confidentiality.

Mr. Bart Oberhauser, a native of Mountainside, New Jersey, is employed at Bristol Myers Company, New York City. He attended Frederick College, Portsmouth, Virginia and did graduate study at Seaton Hall at South Orange, New Jersey. He feels that the opportunity is there, so we should take advantage of it. He advises that we stay in school and get a degree. Once we get the degree we have it made.

Mr. William Perry, the speaker for the occasion, was born in Rochelle, New York. He is employed at Western Electric, New York City. Mr. Perry writes speeches and edits publications. He attended college at CCNY. He feels that this is the shortest four years of our life because we are going to be working for forty years, and what we do in these four years is going to be vitally important, not how you are going to live your life. He said "we are here from industry today, demanding the best and we, therefore, expect you to be the best you can be. The opportunity is there but there aren't enough qualified people."

Mr. George R. Simpson '64 graduate of our College in the field of Chemistry. He is now working for the Baltimore City Bureau of Water Purification, Baltimore, Maryland. This company supplies portable purified water for the city. Mr. Simpson's job involves testing and control of the various constituents that make up the water. He also does pollution control experimentation. His advice to us is to become as much as possibly involved in the curriculum set up in the institution, as to obtain as much knowledge as possible. In doing this, you would thoroughly prepare yourself for whatever may result. "Due to the fact no individual can predetermine his future career 100%, a thorough education will open the door and make available the feasibility of a future. Hard work will determine your final outcome."

Mr. Robert Moody '58 graduate of our College is working in the Newburgh Public Schools, Newburgh, New York. He received his M.A. from Columbia University and will complete work on PhD. at Indiana University. He feels that there is a great individual reward in teaching and everyone, no matter what their profession, had to have a great teacher in order to inspire him to succeed in what he is today will be in the future. Mr. Moody advises us to

set a goal and work with all our heart and soul to fulfill that goal.

Mr. Earl Francis who is employed at Allstate Insurance Company, Brooklyn, New York, was a Health and Physical Education major. On campus he was President of the Student Council and a quarterback on the football team. Mr. Francis is originally from Franklin, Virginia. At the present, he is a Claims Supervisor at Allstate. Mr. Francis advises all students to set their sights high and seek their ultimate potential.

Mr. Ed Adams, who is employed at Bristol Myers Products Company in New York, was born in Newark, New Jersey. He attended Howard University, majoring in Accounting. He spent thirty-three months in the United States Army. He thinks that people should become aware of the flexibilities of opportunities, and by that he means that a person is not restricted by whatever specialization he chooses to study because each position in a career has several variations leading from it and each subsequent position opens new avenues. His job title is Administrative Accountant. He is responsible for job outlines methods, and procedures and tries to improve them. Mr. Adams demonstrates to the people that he works for that he can do his job and others, well. His job also involves making sure everyone in the Accounting Department is doing what he is supposed to do and knows what he is doing so that the next per-

## Dean's List 1st Semester

### FRESHMEN

Salley A. Davis, Anita Fitzgerald, Bettie Jones, Cleo Lancaster, and Gladys P. Slade.

Slade, Tarlton R. Small, Eunice Smith, Lenora T. Spence, Wayne E. Thompson, Juanita Vereen, and James A. Westley.

(Other classes than the Seniors were omitted due to lack of space.)

## Social Science Department

We the undersigned upon investigating the structure and practices of the Social Science Department make the following recommendations:

1. An additional full time qualified Sociologist of the Black race who is fully conscious and is aware of the needs of Black students.

2. A publication stating the exact requirements of History and Sociology concentrations in order to eradicate difficulties encountered during pre-practice teaching and the senior year.

3. A program be instituted to set up a major rather than concentration in Sociology and History.

4. Introductory courses in Sociology and History be taught on a major and non-major basis. (Sections to be reserved for majors.)

5. Re-evaluate and broaden the curriculum.

6. Non-teaching curriculum should be extended (courses and personnel), to the point whereas non-teaching majors be given 12 hours in pre-professional Sociology.

7. The Comprehensive be extended to the point whereas it will be Comprehensive.

## Lectures In Moscow

(Continued from Page 1) writings.

Besides being listed in Who's Who in American Education, Dr. Cooke belongs to the following fraternal and professional organizations: Sigma Xi Scientific Society, Psi Sigma Biological Society, American Entomological, Elisha Mitchell Scientific Society, Omega Psi Phi Fraternity, Leaders in American Science, American Association for the Advancement of Science, Academy of Science of Philadelphia, Academy of Science of North Carolina, and Beta Beta Beta Scientific Society.
