

Cheese Eaters And Conformists Are Out

This year's Student Government election brought about a change, a change that will be beneficial for the student body.

The conformists and cheese eaters and conformists? They were the students who filled certain offices and who sat in on the Advisory Council.

These persons were guilty of saying "yes" to the Administration on too many controversial issues.

I truly believe that if they said "no" on more issues, our school would be able to produce better qualified student leaders.

This practice of going along with a good many of the proposals given by the Administration, was not the case with all of our SGA officers, but the majority fell into this group.

It is hoped now that our newly elected SGA officers will not be guilty of this practice, to an extreme degree.

Yes, this year's election has brought about a change. So to the Advisory Council I say, look to this change with a glad heart. For this change will prove to be a change that will determine a better future for ECSU.

"Is it true that Leonardo da Vinci invented the helicopter many centuries ago?"

Invented? No. Envisaged the possibility of? Yes. Da Vinci, the brilliant Italian artist and inventor, produced drawings showing a craft driven by a pair of coaxial wings. Although his sketches embodied sound aerodynamic principles, he had no means of power-

ing the machine. The first truly successful helicopter was designed by the German engineer, Heinrich Focke, and flown in 1936.
