THE FACTS ABOUT PROBLEM PREGNANCY EDUCATIONAL SERVICE

Since the abortion laws have been liberalized in New York State, clinics have realized that a great profit can be made with the performance of abortions.

Abortions performed in these clinics have taken on the appearance of a giant assembly line. Although the abortions may have been performed by licensed gynecologists, little concern is taken for the medical and mental benefit of the patient.

Girls have been shuttled in, given the abortion procedure, and shuttled out without the proper preceding medical tests and post-abortion advice. Also, the mental state of the anxious woman is of no concern to these flourishing clinics.

We at Problem Pregnancy Educational Service, feel that this is a disservice to the apprehensive woman. At the clinics with which we are associated, all girls will be given a complete medical examination. Each girl will receive a blood test, urinalysis, chest x-ray, pelvic examination, an internal examination, and all patients will be mentally prepared prior to the abortion procedure. There will be other medical efficiencies that will be in effect that cannot be put in laymen's terms.

Since a friendly face is a welcome sight to a lonely girl in a big city, a free limousine service is provided to and from any airport, bus, or train terminal in the New York City area. This will also help to reduce transportation costs. If desired, all girls will receive birth control counseling along with a free months supply of oral contraceptives.

Before leaving the clinic each girl will have in her possession various medications to be taken as directed. The actual abortion procedure itself is called the vacuum aspiration method, which is the most advanced technique of its kind. With this method there is no cutting or surgery involved at all. The vacuum aspirator is nothing more than a mild suction and is completed in approximately two minutes. A local anesthetic will be administered which will make the procedure 100% painless.

Needless to say, a surgeon gynecologist will perform the procedure. A full staff of registered nurses and assistants will be at his disposal. Women will be able to walk right out of the clinic after a brief relaxation period. There will be no doubt in her mind that she has been in the most competent medical hands.

Last, but not least, we are a non-profit organization and no girl will be turned away regardless of her economic position.

Sincerely yours,

Phil Wexler

Band News

The Marching Vikings are still at their best, as we knew they would be. They are now under the direction of a young, energetic, and highly trained musician, Floyd L. Robinson. He is a native of Newport News, Virginia and a graduate of Huntington High School where he served as student band director of the H.H.S. Vikings. He received a B. S. in Instrumental Music Education from Virginia State College, where he worked as a counselor in Personnel and as a percussionist in the Department of Music. He has also done further graduate study in guidance.

Mr. Robinson taught instrumental and choral music at East End High School, Suffolk, Virginia, where his band received eight "superior" and three "excellent" ratings at contests. He served as Regional chairman of V.I.M.E.N.C. and as Marimbist and Percussion Clinician at various workshops.

He holds membership in the following organizations: Music Education National Conference, Percussial Arts Society, Persian Rifles National Honor Society and Omega Psi Phi Fraternity, Inc.

Spirit, practice and precision are all vital aspects of Viking Band life. The foremost goal of each member of the ECSU Band is to receive a high quality education. The Band is service to ECSU in any way which will enhance the image and stature of the school.

The 1971 Marching Vikings schedule has a big "E" for excitement. The band will perform at all home and road games. The band is also being considered by the Cleveland Browns and New York Giants Pro-football Clubs to perform at half-time.
