

Tim McLendon

Geology

Scholarship

Recipient

By Rita Carroll

E.C.S.U. is proud to offer congratulations to Timothy Todd McLendon for academically achieving a \$1,000 Geology scholarship from The National Association of Black Geologists and Geophysicists. Tim is the first recipient of this prestigious award.

He received the award January 13, 1983. He stated that his reasons for applying were because Dr. Maurice Powers, a member of the Geology Department, influenced him to do so. He added that this is the first scholarship that he had applied for. His credentials for receiving the award were to write a five hundred word essay on why he wanted to become a geologist.

Tim is a Geology major and is a sophomore from Albemarle, North Carolina. His future plans are to attend graduate school, however, he is undecided about which college he'll attend.

It is inevitable to state that E.C.S.U. is involved in great academic scholarship programs for its students. This motivates students to stress academic achievement and to attain and to strive for success in doing so. This quality in itself stresses, only in part, the quality of knowledge and learning shown by our students.

Second Annual Techfair

By Lynette Gutridge

Dr. Bishop M. Patterson, chairman, Fair '83, announced that the second annual Applied Technology Fair, scheduled April 21-23, will be showcased on the Elizabeth City State University campus. These projects will feature technologies and projections for economic development of Northeastern North Carolina.

Dr. Parker Chesson, President, College of the Albemarle, and Dr. Donald H. Hessenflow, NNCT Executive Director, are joining with the university as co-sponsors for the Northeastern North Carolina Tomorrow. The organization is seeking to give visibility to the assets and concerns of the 16 counties it represents.

There will be technology projects from the five area community colleges and Chowan College, exhibits for the Job Skills Training Program, and the New and Expanding Industry Program, supported by state funds at the community colleges.

Scholarcade '83 promises to be even better than last year's Scholarcade '82 which was a resounding success, raising over \$5000 dollars in scholarship funds. The word Scholarcade was coined from two words which describes its purpose and source of energy--scholarship and cavalcade (a parade of talent.)

A Scholarcade is an event for the family and/or a general audience. It is a time when faculty, staff and administrators shuck their academic regalia and ivory tower ways to sing, dance, and act as would be

Dr. T.V. Beasley is the ECSU Planning Director. Dr. James H. Townes, chairman of the Department of Physical Sciences, will coordinate departmental exhibits and demonstrations.

The fair will offer an opportunity to view a variety of technologies which could advance many of the potentials of the region in coming years. It may also help work toward the development of ECSU as a regional center.

The NNCT will host a large area of exhibits, films, and profiles of the area. Efforts to highlight Economic Development Day will be highlighted when regional industrial developers will meet with state developers and potential clients from other areas. These activities will be the highlight of the second day of the fair.

Aristedes, the winning horse in the first Kentucky Derby, held in 1875, was ridden by black jockey Oliver Lewis.

Scholarcade '83'

Hollywood stars. Fun will be had by all, and you will be guaranteed to have a ball in Williams Hall on Sunday March 27, 1983 at Scholarcade 83.

Three students are presently on Scholarcade Scholarships at ECSU; Jarona Burrus, Willie Lowe and Anthony Lewis.

The purpose of this extravaganza was emphasized effectively as last year's Scholarcade - Scholarship recipients (Jarona Burrus and Willie Lowe) were introduced to the audience.

Year of the Arts

By Shawn Watson

The Pasquotank Arts Council will be presenting the, "1983 Arts and Crafts Spring Festival," at the Knobbs Creek Recreation Center, March 24-27, 10am-9pm.

The festival will be featuring an Art Gallery by individual Artists, Craft booths, dancers, musicians, and singers. There will even be included a special exhibit for children ages 6 and up. Children will have a chance to visit with the Easter Bunny on Sunday the 27 of March.

Refreshments will be served and from 6pm to 7pm each evening there will be dinner music.

So come on out and support the PAC because, every dollar you invest goes back into the arts for our community.
