WINSTON-SALEM STATE COLLEGE, WINSTON-SALEM, N. C.

FEBRUARY, 1968

Art Classes Hold Exhibit

The art department held its annual Public School Art Exhibit on January 18-25. The exhibit was a project of the students of public school art. The public school art course consists of three classes, all taught by Roland S. Watts.

The nature of this course lies in the understanding of the child's natural development in art. This is essential to the successful guidance of children. Creativity is developed through a program of learning experiences based on child growth in visual expression.

The course has been designed because it is believed that all children have within themselves ideas waiting to be expressed.

This course is the answer to the need voiced by mothers, by classroom teachers, and by students for a comprehensive and practical program which applies directly to the teaching of art in the primary grades, Watts said. The aim is to supply concrete assistance to the untrained teacher in art, so that the student concludes, "This is not hard to do; I can do it."

The course is simply planned to help teachers who will not have supervisory assistance in art. Guidance is given for planning experiences in terms of growth and developmental learning of the young child.

The objectives of the course are: To provide theoretical knowledge that each teacher needs to be equipped with; to create an atmosphere for the growth of self-expression; to introduce and provide experiences in different art media; to encourage students to explore freely in a variety of subjects for expression; to develop creative thinking; to familiarize students with their exact contemporary purposes in teaching art in public schools.

The course is divided into two parts. Part one presents theoretical information for the teacher so that he may develop his professional background before he enters the classroom. Part two suggests actual classroom activities in art.

The exhibits were composed of paper bag masks, paper sculpture, puppets, papier mache bowls, scrap projects, and box animals.

Outstanding creations in each area were made by Mrs. Agnes Gay, an elementary education major and a resident of Winston-Salem.

Some of the exhibits will be given to the Head Start Program and underprivileged kindergartens. Others will remain in the art department.

Enrollment Increases

Approximately 140 students are expected to join the Winston-Salem State College family the spring semester.

Mrs. Fannie Williams, the admissions officer, estimated that there will be from 75 to 100 returning students, about 35 new freshmen (by the way a majority of these will be young men), and a limited number of transfer students.

Varied Activities Planned

The Student Council is planning many activities this semester that it feels the student body will enjoy.

For health enrichment there will be films shown (time and place to be announced). These films deal with such complex subjects as Sex, Problems of Abortions, Birth Control, Delivery of a Baby, L.S.D., Marijuana, and various other health subjects. The Council hopes these films will encourage student dialogue after the films are shown.

Lewis Turner, president, said he will work endlessly to activate more thoroughly a tutorial program which he believes is greatly needed. This type of program has won wide acclaim on neighboring college campuses, he said. "There is no reason why this college and its students should not benefit from such a program," he said.

For recreation and social activity, Turner would like to have the lounge open every Saturday afternoon. The students who use the lounge have been commended for their conduct by the

Rabbi to Speak

The Jewish Chautaugua Society will be the host at chapel, Wednesday, February 14. This organization supplies Rabbis to speak on college campuses on a variety of subjects.

Previously the Rabbis have discussed topics popularly requested such as the synagogue — its history and character, the Hebrew Prophets, what we Jews believe, what every Christian should know about Judaism, music of the synagogue and many more selected topics.

On Valentine's Day the Society will send a Rabbi to speak on the attitude toward war and peace.

Guidance Department and members of the Administrative Council, he said.

Here are a few of the activities the Student Council has planned for the spring semester: Several semi-formal dances featuring such bands as Gore and the Upsetters and the Versatiles.

Daddy-O will be guest disc-jockey. Before May a recording artist or a group will appear on campus in concert. Motion pictures will be shown on Sunday

(time and titles to be announced).

Turner said that the student body has been delightful to work with.

"Of course we need to improve ourselves in many ways," he said. "I, as President, gladly say I am proud to work with our students. May you continue to improve those areas that need improvement and benefit to the fullest, intellectually, scholastically, and socially.

BLACK POWER LEADER TO APPEAR AT WSSC FEB. 13

The Afro-American League held its regular meeting Wednesday, January 17. The League plans to invite students from several black colleges here on February 10 and 11. The students are representatives of the G.A.S. They represent such colleges as A and T University and North Carolina College.

The Grass Roots Association for students is dedicated to working in the black community to help solve some of the basic problems of black people. The Afro-American League is affiliated with G.A.S.

A program is planned for 8:00 p.m., Tuesday, February 13 in J. S. Hill Hall. Howard Fuller, a black power advocate, will speak.

The Afro-American League is planning to address itself to two areas. One is creation of a dialogue concerning curriculum reform at Winston-Salem State. The other area of concern is voter education and registration in the black communities of Winston-Salem.

—Charles Thornton

SGA to Sponsor Sweetheart Ball

The Student Government Association will sponsor the Sweetheart Ball at 8:00 p.m., Saturday, February 10 in Whitaker Gym.

There will be live music by the Versatiles. Young men are encouraged to wear sport jackets and young ladies, Sunday attire.

Why does day break before night falls, and why does night fall before day breaks?
Question:

Why does white milk make yellow butter?

Why is the blackberry blue?

Shoo Fly! No, It's Fruit Fly

Most persons swat flies, Miss Cynthia E. Wells, a biology major at Winston-Salem State College, breeds and studies them.

Miss Wells, a senior at the college, is studying a special type of fly, the fruit fly. She is investigating the effects of radiation on the eye color of normal fruit flies, those with red eyes, and mutant fruit flies, those with white eyes.

The project is supported by a grant from the Research Committee of the North Carolina Academy of Science. The results of the study will be presented in a paper which Miss Wells will prepare and read to the Academy when it meets in May at the University of North Carolina in Greensboro.

Miss Wells is a graduate of Sedalia High School and the daughter of Mr. and Mrs. Bernard Mitchell of Sedalia. She is a member of the Collegiate Academy of the North Carolina Academy of Science and was recently elected to Who's Who Among Students in American Colleges and Universities. It was at one of the meetings of the Academy that Miss Wells was inspired to do research on the

fruit fly.

In addition to learning something about the effects of radiation on eye color, this project will acquaint Miss Wells with the experimental methods of scientists and give her experience in writing and presenting

a paper before a learned society.

Miss Wells' hobbies are reading, tennis and swimming. She plans a career in medicine. She is being advised by Dr. Jacqueline R. Shepperson, Chairman of the Science Department and Mr. W. C. Jordan, biology professor.
