SAINT AUGUSTINE'S COLLEGE, RALEIGH, N. C.

DECEMBER 16, 1964

Pictured above are the newly elected members of the Alpha Kappa Mu Honor Society at Saint Augustine's College. Standing from left to right are Juana Lopez, John Larkins, Judith Moore, Maur-

vene DeBerry and Alma Thomas. Dr. Prezell Robinson rear center, Executive Dean of the College, is Advisor of the group. Not pictured is Alberta Jackson.

Six Are Inducted Into A K M

Recently, six students were inducted into Alpha Kappa Mu, the encompassing honor society on Saint Augustine's campus. The requirements for membership in this society are that each student have a general average of 2.3 and be of good character and leadership.

The new members are: John Larkins, a science major of Jersey City, N. J.; Maurvene DeBerry, an English major of Raleigh, N. C.; Juana Lopez, an English major of Panama; Judith Moore, an English major of Fayetteville, N. C. Lucille Thomas, a French-English

major of Raleigh; all juniors and Alberta Jackson, a senior and physical education major of Edgefield, S. C.

Dr. Prezell R. Robinson, Executive Dean of the College, is advisor of Alpha Kappa Mu.

Plans Told For Institute

The Department of English at Saint Augustine's College will hold its Seventh Language Arts Institute on April 3, 1965. High school teachers of English from surrounding areas in North Carolina are invited to participate in the annual event.

This year's theme "From They To He: Interpretation and Analysis" will incorporate many areas, including literature, audio-visauls in teaching English, linguistics, and remedial English. Since reading is considered one of the most important areas of communications, many aspects of reading will also be discussed, including the novel, the short story, and the periodical.

Although the Institute is designed to bring about greater articulation between the high school teacher of English and the college teacher of English, the English Department has agreed to invite noted consultants in the aforementioned areas to render their services.

The following English majors have been appointed to serve on various committees: Miss Betty Cook, Miss Lena Crudup, Miss Maurvene DeBerry, Miss Rozell Elam, Miss Anne Gaskins, Miss Dianne Harris, Charlie Howard, Miss Judith Moore, Miss Edith Murrell, Miss Carolyn Jackson, Bernard Jones, Miss Juana Lopez, Ralph Knuckles, Miss Iris Sanders, and Miss Brenda Williams.

College Gets Curriculum Lab

By ELEANOR F. SMITH

The College curriculum laboratory is under development in the Department of Education. Dr. J. T. Guines, Head of the Department, is in charge of collecting and purchasing the materials and equipment which are to be a part of the curriculum laboratory. The curriculum laboratory is a service center which is found in most outstanding teacher education programs. It renders a vital and important service to the preparation of teachers for the full range of activities that go on in schools of today in many ways. According to Dr. Guines, it is a library since school text books for all grades and in all subjects may be checked out for study by teacher trainees. Not only will there be textbooks in the curriculum laboratory under development, but there will also be professional bulletins on almost any subject of interest to teachers in today's schools. Selected library books which would be found in the public schools across the country will also be included. There will be more than books in the curriculum laboratory. One will find standardized tests of all sorts, both individual and group. These tests will include keys, directions for administering and profile charts which are used to plot the performance of a class or individual on the test. These tests should afford valuable opportunities for students to become acquainted with the kinds of tests they will be expected to use in their teaching positions.

Other materials which will be in the curriculum laboratory will be

in the line of audio-visual aids. Film strips of all sorts on most subjects, grades one through twelve, will also be found in the laboratory. Teaching games for the language areas; English, Spanish, and French will be found. Records in the social studies, arithmetic, music, science, health, and other subjects will be found in the laboratory. Bulletin board ideas, science kits for simple experiments, as well as resource units will be found in the laboratory.

Another useful area which will be a part of the laboratory will be the instructional materials gathered from all over the state of North Carolina and the United States. This material includes courses of study, reproduced bulletins, school handbooks, curriculum guides and many other types of aids. This should render valuable information to teacher trainees who would like to know, for instance, what the seventh grade science or social studies program looks like in another part of the state or country.

As planned, the curriculum laboratory will render certain services to the students at a small cost for materials. This service will be in the form of running off ditto masters for students who are attempting to make class reports or demonstration lessons in various methods and other courses. The student will probably purchase his ditto master from the laboratory, prepare it, and return it to be run-off on a ditto machine which will be in the laboratory. Of course

the student must pay a small cost for paper which will be used for this service. This small cost is not for profit, Dr. Guines makes clear, but will be used to purchase more supplies and keep the service going to aid students. Other services to students will be the checking out, to students, of record players for class use and also tapes and tape recorders.

Students and teachers of the college will have the use of the laboratory early in the second semester.

U. N. In Big Assault On World Illiteracy

UNITED NATIONS, N. Y. — The United Nations has taken steps to speed development of information media in areas lacking adequate mass communications for spreading education and culture.

The program is expected to produce widespread growth of press, radio, television and film facilities in Asia, Africa and Latin America.

The world organization was stirred into action by a survey made by the U. N. Educational, Scientific and Cultural Organization (UNESCO) showing 70 per cent of the world's population is without proper communications facilities.

According to conclusions drawn from the survey, an estimated two billion persons lack the benefits inherent in mass media in such fields as information, education, culture and entertainment.

from Lehigh University and The City Folk from Bucknell University. These winners, in addition to other first place winners in previous years will not be eligible to compete in the 1965 I.M.C.

Instrumental groups of less than full orchestra size will compete on one evening. Prizes of \$250.00 \$100.00, and \$50.00 will be awarded for these winning groups. Any style of music is permitted, except "rock and roll."

Vocal groups, both folk and popular, will compete on the second night for identical prizes.

Two previous winners in the I.M.C. are now professional groups. The Tradewinds were the grand prize winners of the First I.M.C. in 1962. The City Folk won in the 1963 and 1964 I.M.C. and have been seen on television this past summer.

For further information on the 1965 I.M.C., groups may write to I.M.C., Box 39, Lycoming College, Williamsport, Pennsylvania.

Students Elect An "LBJ"

By JUANA LOPEZ

Lottie Baker, Jr., a native of Willow Springs, North Carolina, is our new Student Council President. He was elected recently by popular vote, along with Ralph Person, vice-president; and Edward Chester, member-at-large.

Upon hearing of his victory, Lottie expressed his thanks to all who made this honor possible. At a recent assembly, the entire Student Council was officially installed in the Health and Fine Arts Building. In our "L.B.J.'s" speech, he mentioned President Johnson's call "for the establishment of an All-American Party for all Americans." Mr. Baker concluded with the following statement: "Today I call upon you for the erection of an All-American Student Body here at Saint Augustine's College."

Our president is a history major with a minor in English, plans to attend graduate school immediately after he leaves Saint Augustine's College. His aspiration is to become a lawyer.

At present, Lottie Baker, Jr., is the national executive secretary of the Sigma Rho Sigma honor society, the president of the Beta Xi chapter of the Phi Beta Sigma Fraternity, Inc., a member of the Social Science Club, a member of the Canterbury Club, and a candidate for membership in the Phi Alpha Theta historical honor society. His hobbies are fishing and writing poetry.

The General Assembly's Social Humanitarian and Cultural Committee recently passed a resolution inviting the U. N. Technical Assistance Board and the Special Fund to help the developing countries in strengthening their mass communications.

Approval of the resolution opened the way for U.N. projects in areas where information media have suffered from lack of money and technical know-how.

U.N. officials regard the right to information as one of the fundamental rights of man. The UNESCO survey, they said, showed that this right is only theoretical for most of the world's people and demonstrated a definite relationship between development of information media and general economic and social progress.
