DEBBIE PIFER and DR. JOHN DAVIS

Pifer Receives Scholarship

News Bureau--Debra Rae Pifer, a senior music major at N. C. Wesleyan College, has been awarded a Presser Foundation Music Scholarship for the academic year 1972-73.

Wesleyan President Thomas A. Collins, in making the announcement, stated, "This scholarship is awarded for music excellence, and Miss Pifer is the second recipient of the Presser grant at Wesleyan."

The Presser Foundation grants are limited to approximately 100 universities and colleges with outstanding music programs. N. C. Wesleyan was selected as one of the participants in 1971 after the Foundation's careful examination of the college's music department.

In designating the award, preferential consideration is given to students who are studying to become music teachers. Other requirements are

that the student be of good character, satisfactory ratings and in good academic standing at the college level.

A music education major whose special field is voice, Miss Pifer plans to teach elementary school music after her graduation. She has performed frequently in solo roles and with the Wesleyan Singers, the college's largest choral group. She is a member of the Chamber Singers, a select nine-voice group which performs at civic and college events.

Miss Pifer, who presented her senior recital here in October, is studying voice with Dr. John Davis, associate professor of music at Wesleyan.

She is the daughter of Mr. and Mrs. Robert Pifer of 2218 Shoreham St., Durham. Miss Pifer is a 1969 graduate of Durham High School and during her student days there studied voice with Mrs. Vera Twardell, a private teacher.

Homecoming Announced

The Social Commission of N. C. Wesleyan College recently announced plans for Homecoming to be held the first week-end in December. "Pheadra", a seven-member musical group from Georgia, has been booked to play for the Homecoming Dance Saturday night. This year the dance will be held at the Shrine Club and will be from 9 p.m. until 1 a.m. "Fable," one of last year's attractions for Spring Fling Week-end was to have entertained but problems within the group have kept them from honoring the commitment. "Pheadra" is very similar to "Fable" and, according to Tom Hardison, Social Commission member in charge of bookings, "They have a solid reputation in the South as an excellent top-40 and rock band. We were fortunate to be able to book the group on such short notice."

The Commission announced that the Homecoming representatives and the choice of queen will take place same as in the past. The bed race will again be a part of the festivities, this year sponsored by the Junior Class.

One objective of the Commission this year is to reestablish the tradition of homecoming displays and decorations. A prize will be given to the group who is responsible for the best display. Information may be obtained from Chris Speelman, Social Chairman.

"We intended," said Hardison, "to attempt to make Homecoming an entire week-end for

Multiple Sclerosis Week Held At NCWC

Circle K has begun its campaign against M. S. with an extensive educational program to alert the public to the tragedy of Multiple Sclerosis. Marty Lombardo, of New York, N. Y., Coordinator of Youth Activities National Multiple Sclerosis Society, visited the Wesleyan campus this past week. He began his speaking tour by addressing an open meeting of the Circle-K Club in the private dining room. Immediately following the Circle-K meeting Lombardo addressed interested members of the Rocky Mount community in the staff room of Peoples Bank. Lombardo continued his tour by appearing on the Carolina Today Show, a local program televised by WNCT, channel 9, Greenville, N. C. That afternoon Lombardo addressed the Rocky Mount Kiwanis Club. He completed his tour by speaking to other civic organizations, including the Roanoke Rapids Kiwanis Club.

Lombardo, who is a 30-year-old graduate of Rider College, Trenton, N. J., became interested in the fight against MS because as he said, "It is a disease of young adults, and it's our responsibility to become involved. We have an untapped source of manpower and idealism in college students who are eager for community involvement and are looking for meaningful ways to help others."

Lombardo travels to schools and colleges across the country, where he is building an

organization of more than 15,000 young adults who volunteer time and talents to abolish the crippling neurological disease.

More important than Lombardo's presence throughout this community was his message. A message of discrimination against young adults between the ages of 20-40; a message of pollution, of the nervous system of human beings; a message of the denial of the rights and liberties of young adults to live a meaningful life. When a person is diag-
