Walking hazards seem to be our biggest enemy for 1960. There have been five employees referred to doctors for medical attention to the ankles and knees. One of them struck her foot against a chair as she was walking in the alley. Two ladies turned their ankles while descending steps. No one can be too conscious of safe conditions and working habits. A member of our Safety Committee received a lacerated finger from the door of a metal cabinet. A lathe operator struck his hand against a revolving grinder. Another lot handler got a splinter under the finger-nail while handling a lot board.
