Off-the-job accidents hurt, too. Several employees reported falls during the snowy March. One employee had a fractured arm. Then, one of the men in the warehouse strained his back while shoveling snow. In the plants, one of the clippers caught her finger in the pulley of the machine; a special switch has been installed to prevent a recurrence. A seamer was shaking out her work and hit her arm against the table. A shipper strained his back while lifting a case of goods. **A LITTLE MORE CAUTION, PLEASE!**
