PLANT ONE			97,614	Nov. 2, 1961	26
PLANT TWO			41,727	July 31, 1961	6

November injuries reported included hand cut on wire band around yarn box while moving the case of yarn - should have grasped edge of yarn case. A seamer tripped over a lot bag while walking in aisle between seamer tables; this might have been avoided by having work taken up before crowded conditions prevail, also the seamers are urged to watch more closely when walking in aisles. A pulled muscle was the result of pushing elevator doors together. A little harder pull on the doors as they come together will help in this situation. A fixer's head was bruised as he was helping move a pulley shaft. Here is an indication of not having sufficient help in moving the machinery. BEST WISHES FOR A SAFE NEW YEAR.
