

"I've enjoyed working here; all of my supervisors have been real nice to me. But now that I'm retiring, I look forward to being able to help some of my older friends --to take them to the doctor or the grocery store when they don't have any way to go."

These were Agnes Creech's comments on her recent retirement from the order department of the Ladies' Hosiery Division in High Point. She had been with Adams-Millis since February of 1934; her entire forty years of service were spent in the order department.

Agnes, more affectionately known as "Smut," was born and reared in High Point. She was born into a family of nine girls and two boys. Eight of the girls and both boys, as well as her father (Shube Pierce) are former employees of the company. Her husband, John Harmon Creech, is employed in the maintenance department of the English Road plant.

Agnes and John have one daughter, Polly Ann, who is a student at High Point Central High. They make their home at 202 Oaklawn Street in High Point. They are active members of Green Street Baptist Church.

MILLER IS NAMED SHOP SUPERINTENDENT

David S. Miller has been appointed superintendent of the machine shop of Adams-Millis Hosiery Company, Jon Wallner, Senior Vice President of the company, has announced. Miller replaces Robert S. Thompson who resigned to form a new business with other associates.

Miller is a mechanical engineering graduate of North Carolina State University. He has passed the examination for North Carolina Engineer-in-Training and is presently completing the remaining requirements to become a licensed professional engineer in North Carolina. Before joining Adams-Millis, he was a design engineer for a Greensboro machine company.

In addition to his past employment and training, Miller has gained extensive experience in

David Miller

the operation and set-up of machine shop equipment in the machining business operated by his family for the past fifteen years. In this family operation, he has become familiar with shop management practices. He is currently enrolled in a course, covering the latest numerically controlled equipment and the techniques for applying it, at the University of North Carolina at Greensboro. A resident of Greensboro, Miller is married to the former Barbara Datson of Statesville. Mrs. Miller is a teacher in the Stokesdale elementary school.

The Millers are members of Faith Presbyterian Church where they both teach Sunday School. David is also a member of the Carolina Wrestling Officials Association.

LANKFORD IS TECHNICAL DIRECTOR

Charles Lankford has been appointed technical director of knitting for the Ladies' Hosiery Division, Walter L. Vonnannon, Vice President in Charge of Manufacturing and Production of Ladies' Hosiery, has announced.

Lankford will work with the research and development of new styles and new techniques in the High Point and Oklahoma plants. He will also be in charge of fixer training.

Lankford was a field technician, specializing in Zodiac four-feed and eight-feed machines, for Spiezman Industries. He has completed their training course for factory representative technician.

Before going with Spiezman, he was a technician with Indian Head Hosiery for 15 years.

HOW TO STAY IN HOT WATER

Check the temperature control on your water heater. Generally, 140° to 150° is about right. Fix leaky faucets. One fast-leaking faucet can waste 1,000 gallons of water a month.

TURN IT OFF

Turn off lights, TV's, radios and small appliances when not in use. Before leaving for vacation, turn off things you won't need. Turn off the air conditioner (unless you have a mildew problem).

Laziness explains more failures than ignorance, but the combination is catastrophic.
