

SEW IT SEAMS

MESSAGE FROM THE PRESIDENT

TO MY FELLOW WORKERS:

This fall, every American has an opportunity to stand up for the inherent freedoms that have made our country what it is. During September, all loyal citizens are invited to enroll in the CRUSADE FOR FREEDOM. The invitation comes from such outstanding leaders as General Dwight D. Eisenhower, General Lucius D. Clay, Ex-Ambassador Joseph C. Grew, and many others.

By joining with these leaders, we can help swell the messages of hope and freedom now reaching millions of persons trapped behind the Iron Curtain — messages beamed to the imprisoned peoples over the transmitters of Radio Free Europe.

Day in and day out, Radio Free Europe carries on a slugging, no-holds-barred war of Truth against the propoganda lies of the Kremlin. It undermines the morale of the Red puppet regimes; exposes quislings and informers BY NAME; sends messages from escapees; and keeps alive the hope of freedom.

Last year, 16,000,000 Americans enrolled in the CRUSADE FOR FREEDOM. Their contributions of over \$1,300,000 erected the symbolic World Freedom Bell in Berlin and built a new station for Radio Free Europe in Munich—the Free World's most powerful transmitter.

If we can win this war of ideas — this cold war — there is a good chance we can prevent a global shooting war.

That is why the CRUSADE FOR FREEDOM this year is asking the support of 25,000,000 Americans — to make possible additional freedom stations, so that we can intensify our counterattack against the Kremlin propoganda machine. The 1951 CRUSADE goal of \$3,500,000 will permit the building of at least two more powerful freedom stations in Europe, as well as a new transmitter for Asia to halt

SAFETY PROGRAM TO REDUCE ACCIDENTS IN ALL PLANTS NOW BEING LAUNCHED

Ossie Wright Will Head Up Activities

A safety program aimed at reducing accidents in the plants is being launched this month by Anvil Brand. Plans for the program were drawn up following the safety lectures given last month by Frank Griffith of the North Carolina Industrial Commission to all supervisors, trainers and union shop committee members.

Ossie Wright has been named to head the central safety committee, whose members will be Jack Rives, Henry T. Short, a representative of the engineering department, Aline Carter, the new personnel director, Herbert Ross, and a representative from each department.

Everyone knows that Anvil Brand is not a dangerous place in which to work, but each month anywhere from 20 to 60 accidents are reported, Ossie Wright objects, the kind of things that can happen in your own homes, but there are still too many of them for a plant the size of ours.

Most accidents — experts like Griffith say — result either from unsafe conditions or unsafe practices. The company will do everything in its power to remedy any dangerous conditions, said Ossie, but since only the people who have the accidents can do anything about unsafe practices, our employees must be trained to work safely and be conscious of safety at all times.

In each department there will be a safety chairman who will make bi-weekly inspections of their respective departments to locate safety hazards. They also will review the accidents that happen in their departments and report to the central safety committee any findings or recommendations they may have.

One very important feature of our safety program will be a fire prevention committee which will be headed by Herbert Ross. All of our

Aline Carter Begins Job As Personnel Director

Mrs. Aline Carter has been named personnel director at Anvil Brand, according to an announcement by President R. C. Kirchofer. The new director replaces Lee Carpenter, who leaves us to accompany her husband to Fort Leavenworth, Kansas.

Although here only a few days, Aline already has found friends, some of whom she knew during her elementary and high school days, for she has lived here virtually all of her life. She and her husband, Claude Carter, an invalid who has been hospitalized for more than a year, have two children, Jimmy, who will be six next month, and start to school, and Jane Ellen, who is only three.

Aline started her working career with the Commonwealth Hosiery Mills here, and when the mills moved to Randleman she worked for them there—a total of ten years in all. Last year she became associated with the Industrial Lithographic Company, resigning her post there to move across Hamilton Street into her new office in the Hudson Division.

ALINE WRENN CARTER

She is a member of the First Baptist Church, and makes her home at the Madison-Monroe Apartments on North Main Street.

Lee Carpenter left among widespread expressions of regret at her departure.

(Continued on Page Eight)

FAREWELL PARTY — Lee Carpenter was the guest of the utility department which gave her a handkerchief shower Friday, the handkerchiefs being presented in a child's parasol, which she is holding. Our popular ex-personnel director also was the recipient of other going-away gifts, the supervisors and trainers presenting her with a handsome double strand of pearls, a compact, and underwear, while the personnel office staff gave her a beautiful gold cigarette case.
