

# Lease of Building Provides 7,000 Square Feet of Storage

Anvil Brand has leased the building formerly used by Neill Pontiac on Wrenn Street and will use the space as an addition to the shipping department, the company has announced. The building will provide about 7,000 additional square feet of warehouse space.

Steel shelves, seven feet high and eighteen feet long, have been erected and members of the shipping department started moving the goods into the new build-

ing last Saturday. A door has been cut from the stockroom in Hudson Plant to connect with the Wrenn Street Building.
