

New Inspectors Start Term With Lively Discussion

A new group of Safety Inspectors held their first meeting last week, when a lively discussion on several safety-related subjects was held.

Probably the most important item discussed was the need for operators keeping their machines in a cleaner condition. Safety Director Ossie Wright brought the subject up, saying there definitely is a need for the machines to be kept cleaner and asked the inspectors for any suggestions about improving this situation.

Ossie suggested the inspectors consider the problem and talk with other employees about it and return to the next meeting with ideas for starting on a "cleaner machines" program.

Ossie mentioned that only a minute or two a day is required to dust off and clean lint from a machine and that if the machines are kept in a clean condition, the operator actually can work better.

The last safety inspection made, which was in August, found these departments with grades of 100: Pants Two, Pants One, Pattern, Cutting at Sherrod, Work Shirt, Sport Shirt, Finishing, Ladies, Utility, Dungaree, Printing Office, Engineering, White Office and Cutting at Hudson.

I don't know how the rest of the baseball pools came out, but the one in the office came out pretty good. For Martha Bell Grimes, that is! She won three times.
