

# 1500 Persons Participate In Resource-Use Educ.

The 12th annual North Carolina Resource-Use Education Conference, which convened here November 13, was attended by more than 1500 supervisors, principals, teachers, students and parents. The one-day conference was divided into three general sessions.

The keynote address was delivered by Dr. Stanley A. Cain, Chairman, Department of Conservation, School of Natural Resources, University of Michigan. Dr. Cain used as his subject: "The Interaction Between Human and Natural Resources". He declared "The whole American economy is production oriented. Much of American attention is directed toward the application of scientific knowledge to increasing our production of goods and services from natural resources—renewable and non-renewable." The distinguished educator said: "The first change that has come over us was due to the realization that our almost exclusive concern with products and quick profits—whether of the forest, the farm, or the oil fields—was resulting in tremendous waste that was socially criminal even if it seemed at the time to be good business and necessary in a competitive free-enterprise economy." He further stated that "The second development in conservation may be called the ecological phase. The ecological phase in the development of conservation has had many consequences already although we still are very far from complete integrated management of our natural resources".

He pointed out that "Not only must resource managers work together to develop integrated programs but all other sectors of the economy and facets of society must be involved. The Michigan educator further stated "We must participate in decisions at the national level, for laissez-faire started dying with the twentieth century." The conservationist declared that "the individual or personal resources of a people are their physical and social conditions, knowledge, and skills." He said "Man creates resources. There is almost nothing that Western man uses directly as it occurs in nature except perhaps a drink of spring water, a wild fruit, a rock to throw, a wilderness view to look at." The distinguished educator further declared "The principle of preservation is acting in the lowering of the death rate and the increase in the span of useful human life."

Finally, Dr. Cain declared that "conservation in this third phase of its unfolding extends the ecological approach from nature

without man to nature with man in a central position, not egotistically, as in pre-Darwinian days, but humbly, and yet erect so as to face the second half of the twentieth century in the role that is worthy of him."

THE MORNING SESSION was addressed by Dr. Catherine T. Dennis, State Supervisor of Home Economics Education, State Department of Public Instruction, Raleigh, North Carolina.

The Resource-Use Education Symposium was conducted by high school seniors. They used as their subject "Using Natural Resources to Meet the Challenge of the Space Age". Participants were: Miss Clemantine Neal, B. F. Person High School, Franklinton, Mr. Joseph Mizell, R. L. Vann High School, Ahoskie, Miss Lillie Helton, J. H. Gunn High School, Charlotte.

The presiding officers of the morning session were Professor G. C. Hawley, Principal, G. C. Hawley High School, Creedmoor, and Mrs. Doreatha E. Williamson, Supervisor, Rowan County Schools, Salisbury, North Carolina.

Two distinguished educators in North Carolina were awarded the Conference Bronze Plaque

Dr. Speigner

for meritorious service in promoting resource-use activities in their counties. They were: Mrs. Delois E. Washington, Jeanes Supervisor, Chatham County Schools, Siler City, North Carolina, and George L. Harper, Principal, Person County High School, Roxbro, N. C.

For outstanding achievement in using community resources to enrich the instructional program, trophies were presented to the following city and county teachers unit: Chatham County,

Moore County, Lee County, Granville County, Vance County, Cabarrus County, and Oxford City Unit, and Franklinton City Unit.

The annual trophy award presented to the county with the largest student delegation went to Lee County for 1958.

The third general session featured Science, Mathematics, and Geography Workshops, plus six resource-use clinics in Conservation, Homemaking, Mental Health, Music, Reading, Principals-Supervisors.

Dr. Theodore R. Speigner, Director of the Division of Resource-Use Education and State Chairman of the Conference, presided at the second general session. Dr. Alfonso Elder, NCC President, presented to Mr. George L. Harper the conference's plaque for outstanding achievements in sponsoring the resource-use program in his county. Mr. Harper is the principal of the Person County High School of Roxboro. Mrs. Ruth L. Woodson, State Supervisor of Elementary Schools of Raleigh, presented the second plaque of the conference to Mrs. Delois E. Washington, Jeanes Supervisor of Chatham County Schools of Siler City, for meritorious ser-

## N. E. A. News

By Bernice Bullock

The James E. Shepard Chapter of the National Education Association held its fourth meeting the first Tuesday in the month during which time further plans for the school year were discussed.

The Shepard Chapter of NEA is planning to visit the planetarium in Chapel Hill during the time of its Christmas program which begins in December and lasts into the month of January. The chapter has also planned to have a series of educational movies to be shown in the Education building during the meetings. At the last meeting, the members discussed the possibility of inviting some speakers to appear at some of the meetings.

vice in fostering a program of resource-use education in her county for almost a quarter of a century. Rev. John Mangrum, principal of B. F. Person High School of Franklinton, gave the invocation.

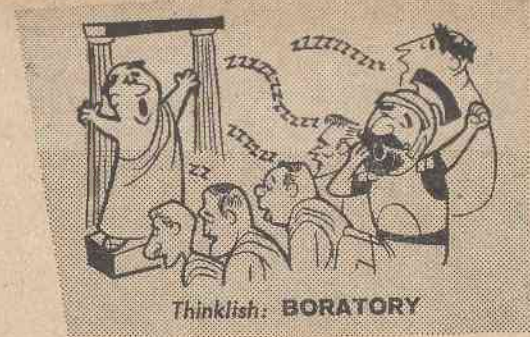

# THINKLISH

English: MAN WHO SQUANDERS HIS LUCKIES

Thinklish translation: When this gent, gives someone the shirt off his back, he throws in free laundry service. In passing around the cigarettes, he knows no peer—it's "Want a Lucky, pal? Keep the carton!" The man's really a walking testimonial to the honest taste of fine tobacco (he buys 247 packs of Luckies a day). Thing is, he gives 246 away—which makes him a bit of a *tastrel!*
