

ATHLETES OF THE MONTH

North Carolina College's basketball team has reached the peak of its season. Three home games were held during the week of January 26, and each time, fans had the chance to see Ronald McCrimmon and Dennis Robinson at their best. Because of their fine performances against Rhode Island, Morgan State, A&T State University and Hampton Institute, "Ronnie Mac" and Dennis share the honors as Athletes of the Month for this issue.

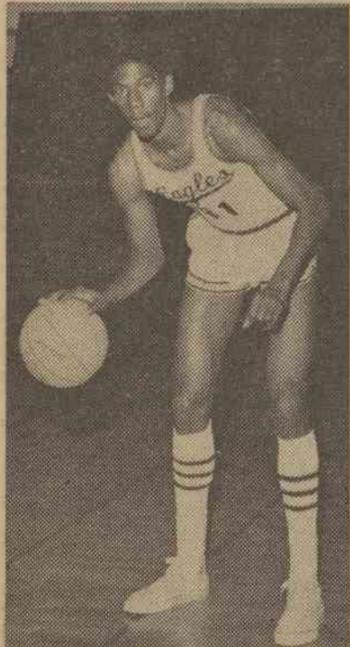

Ronald McCrimmon

Ronald McCrimmon, the 180-pound guard from Wilson, serves as co-captain of the Eagle squad. He is a junior majoring in History and minoring in Sociology. "Ronnie Mac" averages 11.0 points per game and 5.5 rebounds. In the Morgan game, the backcourt wizard brought the crowd to its feet midway in the second half when this little 5' 10" sharpshooter hit three 30-foot jumpers to increase the NCC lead from two points at 48-46 with 10:15 showing on the clock to 54-46 two minutes later. He finished that night with 19 points, 8 rebounds and

4 assists. Ronnie totaled 10 points against A&T with 10 rebounds; 15 points against Rhode Island with 6 rebounds; and 10 points against Hampton with 4 rebounds.

When asked what attributed to the team being so successful in all these games, Ronald replied, "It took team work and a new outlook on our chances of entering the CIAA tournament." Ronald feels that he was under no pressure in any of the games except during the last two minutes of play against

Dennis Robinson serves as center for the Eagles squad and stands 6' 5" tall. He is an Art major from Fayetteville and averages about 8.1 points per game. Dennis was voted in the A&T game as Most Outstanding Player for the Eagles. Robinson was presented a trophy by Lipscomb Promotions for his achievements. He scored 11 points and had 7 rebounds. Dennis shared honors with Ronnie Mas in the Morgan game, scoring 19 points and 12 rebounds. He scored 15 points against Hampton.

Dennis Robinson

(Continued from Page 1)

Daniel G. Sampson of the NCC law school and Duke Law Prof. Ernest Gellhorn during a news conference. Dates for the institute are June 6-July 3.

Gellhorn emphasized the effort is designed exclusively for students from minority groups. The ABA sponsors other programs for underprivileged students from all races, he said.

The Durham program, Sampson said, will serve students from an area extending from Florida to Virginia and West to Tennessee and Alabama. The deadline for applications is March 15.

The spokesmen for the law schools said students will be drawn from those graduating in June and those who have decided to study law after several years of employment.

Participants will be housed and fed on both campuses. Tuition, room and board, books a travel allowance and a stipend to replace lost summer earnings will be given to those accepted for the program.

The curriculum will include a regular law school course covering such subjects as manufacturers' product liability, contract law, constitutional law and legislation.

Two or three hours each week will be scheduled for moot court proceedings with each student taking part in two trials—one for criminal proceedings and the other simulating a constitutional case before an appellate court.

Another area of studies will include a broad background in negotiations with emphasis placed on how law is applied and works in communities. This will entail problems of urban renewal from the point of view of city officials and tenants threatened with displacement.

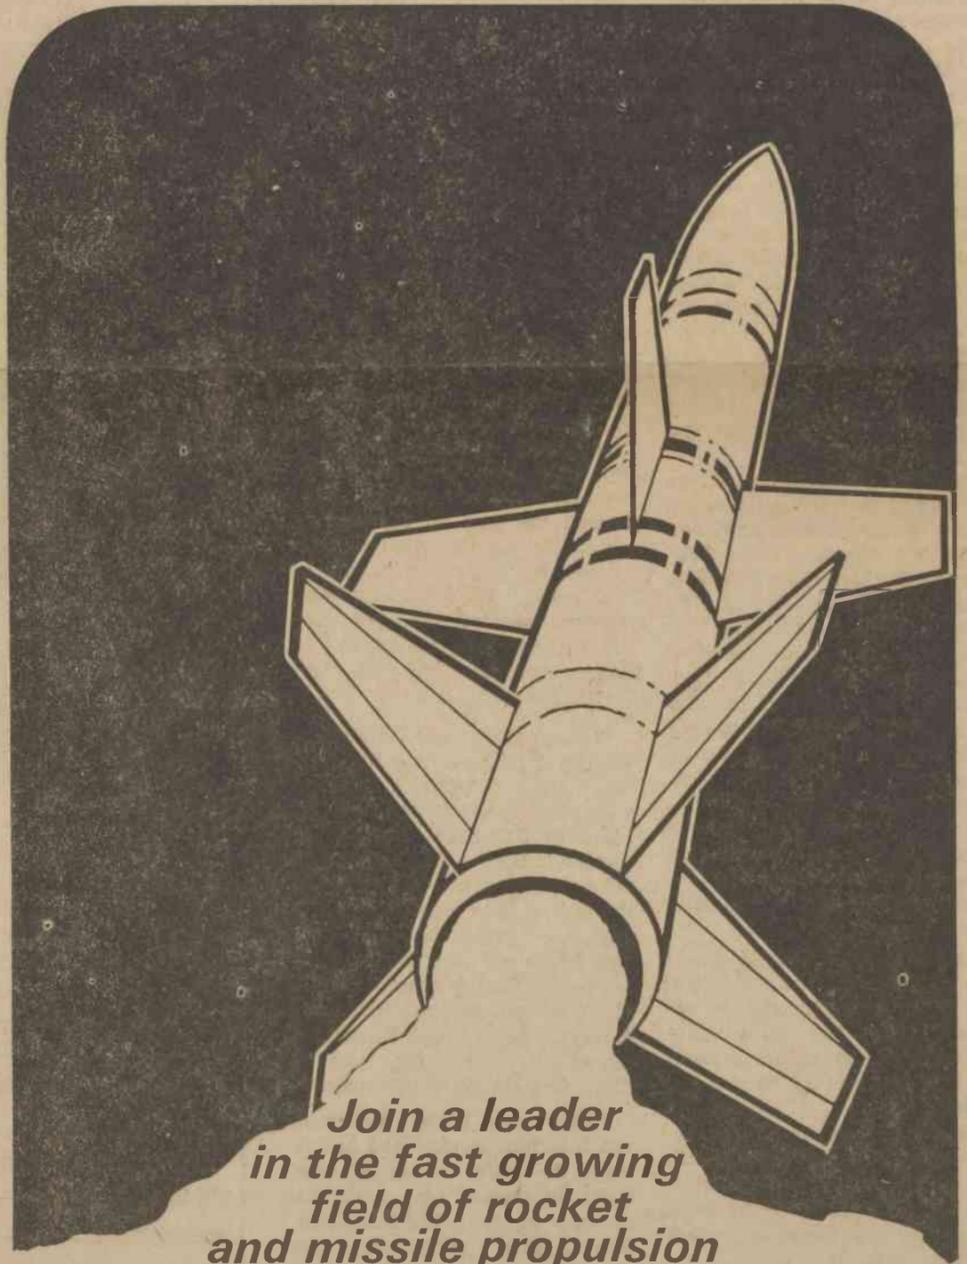

Finally, it was suggested that the curriculum will be rounded out with courses in public housing the operations of court offices, the bail system and racial relations.

CLEO will sponsor summer institutes at nine other locations across the nation in addition to the Duke-NCC program. The objective of the council when it was organized a year ago was to "enhance the opportunities to

Echo Staff Send Tips To Students

Perhaps now that the efforts of the first semester's courses are over and done with, a word of encouragement to the freshmen is in order. To those of you who did not do so well as you would have liked to, we bring the understanding of approximately 90 per cent of our student body, all of whom had the same experience during their first few months here. There is a process of adjustment of acclimation to a new environment and to new situations, which cannot be abbreviated or deleted from a college career. Therefore the best course of action is to try to derive the maximum amount of benefit from all experiences, (be they good or bad) as is possible, and in so doing, improve upon ourselves. To those who were successful both academically and socially, we extend congratulations and best wishes for continued success.

study and practice law for members of disadvantaged minority groups—chiefly Negroes, American Indians and Mexican-Americans."

**Join a leader
in the fast growing
field of rocket
and missile propulsion**

EXPLORE the potential for professional achievement at the Naval Ordnance Station, Indian Head, Maryland.

Few technical fields offer you as many opportunities for an exciting and rewarding career as the rapidly growing field of chemical propulsion. Indian Head is a recognized leader in research, development, production, and evaluation of propellants and rocket propulsion systems and has advanced the state-of-the-art of chemical propulsion through participation with the Department of Defense and NASA. Indian Head has made important contributions to the Polaris, Poseidon, and Sidewinder propulsion systems as well as virtually every missile system in use by the Fleet today.

Located 25 miles south of Washington, D. C., Indian Head is close to the cultural, social, and scientific advantages of the Nation's Capital offering opportunities for pleasant suburban or country life near mountain and shore resorts.
