

Superstine received the B.S. and M.S. Degrees from Michigan. He, his wife and their children, Daniel, four months, and Galya, four, have not made definite plans to change residence.

Anesthesia

On April 23, Drs. C. R. Stephen, Ruth Martin and Leonard Fabian participated in a panel discussion for the Duke Medical Town Hall, presented over WTVD with Dr. George Baylin, moderator. The program gave the general public a clearer understanding of the functioning of the Anesthesia Department in the hospitals of today by taking a patient through all phases of anesthetic procedures. The program received very favorable notice from the press all over the state and we are indeed proud of our staff.—*Inez F. Champion.*

Ob-Gyn Department

Dr. Paul Green has returned from E. Lansing, Mich. where he enjoyed a well earned vacation. While away, he visited the Prenatal Program at Flint.

Dr. Bill Gottschalk enjoyed vacationing in New York the second week in May, and returned quite rested.

Dr. George S. Woodward also enjoyed a few days' vacation in New York.

It is with regret that the Ob-Gyn department lost a good secretary. Mary Preston Hedderly (Rusty), Dr. Turner's secretary, resigned to accept a position in her home town, South Boston, Va.

Dr. Bill Butler has answered the call of duty—and will be stationed with the U. S. Air Force in Middlesex, England. We will be looking forward to his return in "2 years."

Dr. and Mrs. Kenneth Cuyler are on a trip to California, where they will visit their son.

Biochemistry

Mrs. Susan Standerfer of the Department of Biochemistry was married to Luther S. McWhorter on May 8 in Tabor City. They are now living in Roxboro where Mr. McWhorter is general manager of the Pat Brown Lumber Company.—*Mrs. Charles J. Ping.*

Medicine

Dr. George W. Pickering, Professor of Medicine at St. Mary's Hospital in London, England, was visiting professor on Friday, May 20.

Maxine Cook, secretary to Dr. Engel, is leaving Duke on June 1. She is going to New York City, where she plans to work during the coming year.

Rita Lang, technician in Dr. Jack Myers' laboratory, will leave the first week in June. Her husband, Steve, has accepted an Army internship as of July 1.

Dr. Don Carter, Associate in Medicine, left our department on May 1 to assume private practice in St. Petersburg, Fla.

Dr. Hugo Garcia, native of Chile, has begun a one-year fellowship with Dr. Stead. He is a Kellogg Foundation Fellow, sponsored by the American College of Physicians.—*Bess Cebe.*

O.P.C.

So many things of interest happen in the Public Dispensary every day it's hard to select any special ones, but we are all excited about Carol O'Neill's new baby, a beautiful little girl. We miss having Carol work with us, but her position has been taken over by Mrs. Coleen Howard, who is proving herself to be a very efficient person. Mrs. Howard's husband is in Korea for another year, and we are pleased to have her with us.

The business interns come and go and each one has his own place in our hearts, but right now we are thinking of Bert Echeverri who left for his native South America the first of June. Bert endeared himself to everyone here; we marveled at his quick grasp of our language; and his charming manners impressed us all. He invited us to visit him and his hospital in South America, so don't be surprised if you hear of passports being secured for parts South.

We are all glad to have Mildred Ellis back after an accident to her ankle, which has given her right much pain.

We are always happy to have visitors in our Department,—so drop by to see us some time.—*Reba Hobgood.*

Multilith Department

Miss Lucille Waite has just returned to work after her vacation.

She reports that she had an enjoyable two weeks' stay in Winter Park, Fla., where she visited Dr. and Mrs. Alex Waite.

Mr. and Mrs. Carden's son, "Skip" is graduating from Durham High this spring. He plans to enter Duke in the fall.—*Nancy Auman.*

Housekeeping Department

In the past two months we have welcomed a number of new people as employees into the Housekeeping Department: Rosell Williams, Thelma Williams, James Scott, James Latta, Robert Kennedy, and James Blount.

These people are now important members of our hospital family, and we want them to have the feeling of belonging to a pleasant group of workers—a group which will share with them the responsibility of doing certain tasks in a way that will bring credit to all.

Vacation days are here again, and those enjoying them to date are, Frances Jones, Thelma Lindsey, Charlie M. Wall, Ralph Holloway, Josephine Watson, Curtis Terry, Shadraek Elliott, Elsie Hampton, Florence Shaw, and three of our supervisors Mrs. Katie Thomas, Mrs. Gladys Pickard, and Mrs. Mildred Cheek.

Mrs. Mittie Holifield (Tel. Operator) at Baker House is back at work after a nice visit to Texas.

George Smith, Andrew Williams, Collins Haskins, and Floyd Watson are on the sick list, and are home for a few days. Hurry up and get well boys, we all miss you.—*Mrs. Martha Scoggins.*

Anatomy

Dr. and Mrs. Markee recently visited with the premedical advisors and premedical students at Clemson, Furman, U. of South Carolina and The Citadel. Dr. Markee has recently visited premedical students at Wake Forest and Davidson and Dr. Penrod, a few weeks ago, made similar visits to Washington and Lee, V.M.I. and V.P.I. The premedical advisors from these and other schools spent two days with our Medical Admissions Committee last fall. These two-way visits should increase mutual understanding and we hope result in further improvements in medical training and medical care at Duke.
