

GOING UP . . . Over 60 per cent completed, the new wing seems to daily passersby to be going up with amazing speed. The familiar Gothic exterior will house 109 more beds and provide badly-needed space for many departments. A **NEW FOOD SERVICE** area on second floor, at top right, will supply both the new beds as well as many of the existing beds.

THE SCENE AT LEFT may have caused some inconvenience, but nobody complained, for the parking blues will be a thing of the past. Paving all the parking areas means that 25 per cent more cars can be accommodated.

BARE CORRIDORS below will become an immaculate new ward on the second floor. This view was made looking east from the nurses station.

THE 3500 SQUARE FOOT area below right will house three important divisions in the new wing, the Surgical PDC waiting room, private Ob-Gyn clinic and the dental unit. (Photos by Thad Sparks.)
